Sustainability, Capabilities and Human Security Andrew Crabtree, 2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability s significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals

Handbook on Climate Change and International Security Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats

Handbook of Security and the Environment Ashok Swain, Joakim Öjendal, Anders Jägerskog, 2021-05-28 This comprehensive Handbook tackles the increasingly urgent problem of the impact of climate change on conflict and human security It analyses the ways in which scarcity of resources leads to food water and health insecurities resulting in population migration Featuring contributions from leading international scholars chapters cover how these contribute globally to societal insecurity and violent conflict in a growing number of regions

Global Pandemic and Human Security Rajib Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local The responses depend on national governance and policy framework use of technology and innovation and people s perceptions and behavior among many others There are many differences in how the pandemic has affected the rich and the poor urban and rural sectors development and fiscal sectors and developed and developing nations and communities Echoing human security principles the 2030 Agenda emphasized a world free of poverty hunger disease and want free of fear and violence with equitable and universal access to quality education health care and social protection to safe drinking water and sanitation where food is sufficient safe affordable and nutritious where habitats are safe resilient and

sustainable and where there is universal access to affordable reliable and sustainable energy These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide irrespective of its development and economic status Thus the book highlights the nexus between human security and development issues It has two major pillars one is the development and the other is technology issues These two inter dependent topics are discussed in the perspective of the global pandemic making this the most important feature of this book While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect peoples lives and livelihoods in the future this book provides some key learning which can be used to cope with future uncertainties including climate risks Thus the book is timely and relevant to wider readers

Global Environmental Change and Human Security Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and

human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin Soroos Bishnu Raj Upreti *Climate Change, Ethics and Human Security* Karen O'Brien, Asunción Lera St. Clair, Berit Kristoffersen, 2010-07-22 Presenting human security perspectives on climate change this volume raises issues of equity ethics and environmental justice as well as our capacity to respond to what is increasingly considered to be the greatest societal challenge for humankind Written by international experts it argues that climate change must be viewed as an issue of human security and not an environmental problem that can be managed in isolation from larger questions concerning development trajectories and ethical obligations towards the poor and to future generations The concept of human security offers a new approach to the challenges of climate change and the responses that could lead to a more equitable and sustainable future Climate Change Ethics and Human Security will be of interest to researchers policy makers and practitioners concerned with the human dimensions of climate change as well as to upper level students in the social sciences and humanities interested in climate change Environmental Change and Human Security in Africa and the Middle East Mohamed Behnassi, Katriona McGlade, 2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and threats to human security Case studies from Morocco Tunisia Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change *Blurring Boundaries: Human Security and Forced Migration* Stefan Salomon, Lisa

Heschl, Gerd Oberleitner, Wolfgang Benedek, 2017-06-12 In *Blurring Boundaries Human Security and Forced Migration* scholars from law and social sciences offer a fresh view on the major issues of forced migration through the lens of human security. Although much scholarship engages with forced migration and human security independently they have hardly been weaved together in a comprehensive manner. The contributions cover the issues of refugee law, maritime migration, human smuggling and trafficking and environmental migration. *Blurring Boundaries* critically engages boundaries produced in the law with the main ideas of human security thus providing a much needed novel vocabulary for a critical discourse in forced migration studies. *Routledge Handbook of Human Security* Mary Martin, Taylor Owen, 2013-11-07 This Handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years. Human security has been part of academic and policy discourses since it was first promoted by the UNDP in its 1994 Human Development Report. Filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including Nobel prize winner Amartya Sen and Sadako Ogata who jointly chaired the 2001 Commission on Human Security. Drawing upon a range of theoretical and empirical analyses the Handbook provides examples of the use of human security in policies as diverse as disaster management, arms control and counter terrorism and in different geographic and institutional settings from Asia to Africa and the UN. It also raises important questions about how the concept might be adapted and operationalised in future. Over the course of the book the authors draw on three key aspects of human security thinking: Theoretical issues to do with defining human security as a specific discourse; Human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts; Case studies and empirical work. Featuring some of the leading scholars in the field the *Routledge Handbook of Human Security* will be essential reading for all students of human security, critical security, conflict and development, peace and conflict studies and of great interest to students of international security and IR in general. *Climate Change, Human Security and Violent Conflict* Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts, damaging floods and mass migration. Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures. But how severe are the security risks and conflict potentials of climate change? Could global warming trigger a sequence of events leading to economic decline, social unrest and political instability? What are the causal relationships between resource scarcity and violent conflict? This book brings together international experts to explore these questions using in-depth case studies from around the world. Furthermore the authors discuss strategies, institutions and cooperative approaches to stabilize the climate-society interaction. *The Handbook of Global Security Policy* Mary Kaldor, Iavor Rangelov, 2014-03-20 This Handbook brings together 30 state-of-the-art essays covering the essential aspects of global security research and practice for the 21st century. Embraces a broad definition of security that extends beyond the threat of foreign military attack to cover

new risks for violence Offers comprehensive coverage framed around key security concepts risks policy tools and global security actors Discusses pressing contemporary issues including terrorism disarmament genocide sustainability international peacekeeping state building natural disasters energy and food security climate change and cyber warfare Includes insightful and accessible contributions from around the world aimed at a broad base of scholars students practitioners and policymakers

Routledge Handbook of the Resource Nexus Raimund Bleischwitz, Holger Hoff, Catalina Spataru, Ester van der Voet, Stacy D. VanDeveer, 2017-12-14 In recent years the concept of the resource nexus has been both hotly debated and widely adopted in research and policy circles It is a powerful new way to understand and better govern the myriad complex relationships between multiple resources actors and their security concerns Particular attention has been paid to water energy and food interactions but land and materials emerge as critical too This comprehensive handbook presents a detailed review of current knowledge about resource nexus related frameworks methods and governance including a broad set of inter disciplinary perspectives Written by an international group of scholars and practitioners the volume focuses on rigorous research including tools methods and modelling approaches to analyse resource use patterns across societies and scales from a nexus perspective It also provides numerous examples from political economy to demonstrate how resource nexus frameworks can illuminate issues such as land grabs mining renewable energy and the growing importance of economies such as China as well as to propose lessons and outlooks for sound governance The volume seeks to serve as an essential reference text source book and state of the art science based assessment of this increasingly important topic the resource nexus and its utility in efforts to enhance sustainability of many kinds and implement the United Nations Sustainable Development Goals in an era of environmental and geopolitical change
