Recent Advances in Reinforcement Learning Sertan Girgin,Manuel Loth,Rémi Munos,Philippe Preux,Daniil Ryabko,2008-11-27 Inthesummerof2008 reinforcementlearningresearchersfromaroundtheworld gathered in the north of France for a week of talks and discussions on reinforcement learning on how it could be made more efficient applied to a broader range of applications and utilized at more abstract and symbolic levels As a participant in this 8th European Workshop on Reinforcement Learning I was struck by both the quality and quantity of the presentations There were four full days of short talks over 50 in all far more than there have been at any previous meeting on reinforcement learning in Europe or indeed anywhere else in the world There was an air of excitement as substantial progress was reported in many areas including Computer Go robotics and fitted methods Overall the work reported seemed to me to be an excellent broad and representative sample of cutting edge reinforcement learning research Some of the best of it is collected and published in this volume The workshopandthe paperscollectedhere provideevidence thatthe fieldof reinforcement learning remains vigorous and varied It is appropriate to reflect on some of the reasons for this One is that the field remains focused on a problem sequential decision making without prejudice as to solution methods Another is the existence of a common terminology and body of theory
