A Guide to Medical Teaching and Learning Training of the Trainers (Tot) Dr. Abdullah Dukhail Al-Khatami,2018-07-27 This book helps medical teachers and students develop the best approach to ensure a high level of learning achievement Dr Abdullah Dukhail Al Khatami begins by outlining the traditional learning model and how it differs from the learner centered model He argues that

we must recognize the ineffectiveness of how we've taught medical students in the past. The best way to achieve learning, he says, is to encourage learning skills and collaboration learning between the learners and their supervisors through the supervision meeting assessment to identify their learning gap, achievement process and achievement assessment. Instead of focusing on surface learning or memorization, learner-centered learning connects current learning to past experiences. That leads to deep learning and helps learners organize information. This newer approach leverages small groups to further the learning process. Feedback, reflection and work-based assessments measure achievements. By following the models' best practices, you'll be able to prepare trainees to succeed in the field, manage your time more efficiently, encourage appropriate communication skills and professionalism and convince trainees that goals are achievable. Filled with checklists, summaries, graphs, exercises and additional resources, this is a must-have guide for anyone serious about medical education.
