Thomas Pynchon's Animal Tales Keita Hatooka, 2022-08-29 Throughout his works Thomas Pynchon uses various animal characters to narrate fables that are vital to postmodernism and ecocriticism Thomas Pynchon s Animal Tales Fables for Ecocriticism

examines case studies of animal representation in Pynchon's texts such as alligators in the sewer in *V*, the alligator purse in *Bleeding Edge*, dolphins in the Miami Seaquarium in *The Crying of Lot 49*, dodos, pigs and octopuses in *Gravity's Rainbow*, Bigfoot and Godzilla in *Vineland* and *Inherent Vice*, and preternatural dogs and mythical worms in *Mason Dixon* and *Against the Day*. Through this exploration, Keita Hatooka illuminates how radically and imaginatively the legendary novelist depicts his empathy for nonhuman beings. Furthermore, by conducting a comparative study of Pynchon's narratives and his contemporary documentarians and thinkers, Thomas Pynchon's *Animal Tales* leads readers to draw great lessons from the fables which stimulate our ecocritical thought for tomorrow.

In Search of Meadowlarks John M. Marzluff, 2020-02-18 An ornithologist's personal look at farming practices that finds practical solutions for sustainable food production compatible with bird and wildlife conservation. With predictions of a human population of more than nine billion by the middle of this century and eleven billion by 2100, we stand at a crossroads in our agricultural evolution. In this clear and engaging yet scientifically rigorous book, wildlife biologist John M. Marzluff takes a personal approach to sustainable agriculture. He travels to farms and ranches across North and Central America, including a Nebraska corn and soybean farm, California vineyards, cattle ranches in Montana, and small sustainable farms in Costa Rica, to understand the unique challenges and solutions to sustainable food production. Agriculture and wildlife can coexist, he argues, if farmers are justly rewarded for conservation, if future technological advancements increase food production and reduce food waste, and if consumers cut back on meat consumption. Beginning with a look backwards at our evolutionary history and concluding with practical solutions for change that will benefit farmers and ranchers, Marzluff provides an accessible and insightful study for the ecologically minded citizen, farmer, rancher, or conservationist.

Anthropocentrism and Its Discontents Gary Steiner, 2005-11-06 *Anthropocentrism and Its Discontents* is the first ever comprehensive examination of views of animals in the history of Western philosophy, from Homeric Greece to the twentieth century. In recent decades, increased interest in this area has been accompanied by scholars' willingness to conceive of animal experience in terms of human mental capacities: consciousness, self-awareness, intention, deliberation, and in some instances, at least limited moral agency. This conception has been facilitated by a shift from behavioral to cognitive ethology, the science of animal behavior, and by attempts to affirm the essential similarities between the psychophysical makeup of human beings and animals. Gary Steiner sketches the terms of the current debates about animals and relates these to their historical antecedents, focusing on both the dominant anthropocentric voices and those recurring voices that instead assert a fundamental kinship relation between human beings and animals. He concludes with a discussion of the problem of balancing the need to recognize a human indebtedness to animals and the natural world with the need to preserve a sense of the uniqueness and dignity of the human individual.
