Liminal Zones Where Lakes End And Rivers Begin:

Liminal Zones Kim Trevathan, 2013-05-30 After the death of his paddling companion a German shepherd labrador retriever mix named Jasper Kim Trevathan began a series of solitary upstream kayaking quests in search of what he calls liminal zones transitional areas where dammed reservoirs give way to the current of the rivers that feed them For four years he scoured the rivers and lakes of America where environmentally damaging and now decaying man made structures have transformed the waterways In this thoughtful work he details his upriver adventures describing the ecological and aesthetic differences between a dammed river and a free flowing river and exploring the implications of what liminal zones represent a reassertion of pure unadulterated nature over engineered bodies of water Trevathan began by exploring the rivers and creeks of his childhood the Blood River and Clarks River in western Kentucky He soon ventured out to the Wolf River the Big South Fork of the Cumberland and other waterways in Tennessee In 2008 he looped around the country with trips to Indiana s Tippecanoe River Montana s Clearwater River Oregon s Deschutes and Rogue Rivers and Colorado s Dolores River as well as adventures on such southeastern rivers as the Edisto the Tellico and the Nantahala To Trevathan paddling upstream became a sort of religion with a vaporous deity that kept him searching Each excursion yielded something unexpected from a near drowning in the Rogue River to a mysterious fog bank that arose across the Nantahala at midday Throughout *Liminal Zones* Trevathan considers what makes certain places special why some are set aside and protected why others are not and how free flowing streams remain valuable to our culture our history and our physical and spiritual health This contemplative chronicle of his journeys by water reveals discoveries as varied and complex as the rivers themselves Liberal Arts

The Inscription of Things Thomas Kelly, 2023-11-14 Why would an inkstone have a poem inscribed on it Early modern Chinese writers did not limit themselves to working with brushes and ink and their texts were not confined to woodblock printed books or the boundaries of the paper page Poets carved lines of verse onto cups ladles animal horns seashells walking sticks boxes fans daggers teapots and musical instruments Calligraphers left messages on the implements ordinarily used for writing on paper These inscriptions terse compositions in verse or epigrammatic prose relate in complex ways to the objects on which they are written Thomas Kelly develops a new account of the relationship between Chinese literature and material culture by examining inscribed objects from the late Ming and early to mid Qing dynasties He considers how the literary qualities of inscriptions interact with the visual and physical properties of the things that bear them Kelly argues that inscribing an object became a means for authors to grapple with the materiality and technologies of writing Facing profound social upheavals from volatility in the marketplace to the violence of dynastic transition writers turned to inscriptions to reflect on their investments in and dependence on the permanence of the written word Shedding new light on cultures of writing in early modern China *The Inscription of Things* broadens understandings of the links between the literary and the material

Prehistoric London Simon Webb, 2025-07-30 Despite the vast amount of work written and published about London there has never before been a full length book covering the history of that part of the Thames Valley before the arrival of the Romans Beginning in the Cretaceous Era which ended 66 million years ago *Prehistoric London* examines the geology of this part of Britain and explains why this particular section of the Thames proved to be the ideal location for a city It describes too the animals and people who were attracted to the area by the conditions there From the time of the

dinosaurs through to the Iron Age and the Roman invasion in 43 AD this is a comprehensive account of London before London It is the story of the land and those who dwelt there before anybody had thought of founding a city on the banks of the Thames In addition to being a history book though Prehistoric London is also a lively guidebook which explains how to explore modern London and find such things as Iron Age hillforts and a site where anybody can dig sharks teeth from the sand of a 55 million year old seabed This book will reveal the backstory of London and show readers what was happening in the capital long before a single stone was laid of the city we know today Extracting Home in the Oil Sands Clinton

search of answers Her search for a noted glacier museum in Norway led to news that the renowned building had set on fire in the middle of the night before and burned to the ground Dispatches from the End of Ice is part science part lyric essay and part research reportage all structured around a series of found artifacts a map a museum an inventory a book in an attempt to understand the idea of disappearance It is a brilliant synthesis of science storytelling and research in the spirit of essayists like Robert Macfarlane John McPhee and Joni Tevis Peterson s work veers into numerous terrains orbiting the idea of vanishing and the taxonomies of loss both in an unstable world and in our individual lives *Greatest Rowing Stories Ever Told* Göran R. how this destiny is found and lived forward for both each individual life and for our varied human cultures It affirms and gives examples of the deep soul dimension of life that lies under the often chaotic surface the liminal realm of animate and guiding dream vision myth and spirituality where the gods meet us so that we all can find our mutual way Home This liminal world is navigated through the metaphoric and literalness of pilgrimage performance and political processes in our personal and cultural lives What might be your path of destiny
