Rights Approaches to Climate Change Sumudu Atapattu, 2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change its catastrophic impact on human beings was not really understood as a human rights issue until recently This book examines the link between climate change and human rights in a comprehensive manner It looks at human rights approaches to climate change including the jurisprudential bases for human rights and the environment the theoretical framework governing human rights and the environment and the different approaches to this including benchmarks In addition to a discussion of human rights implications of international environmental law principles in the climate change regime the book explores how the human rights framework can be used in relation to mitigation adaption and adjudication Other chapters examine how vulnerable groups women indigenous peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues **Human Rights Approaches to Planetary Crises** Samvel

Varvastian, 2024-11-11 This book analyses over 20 years of rights based litigation in the areas of climate change and plastic pollution in order to assess the value of rights in confronting and overcoming planetary crises We live in an age of planetary crises such as climate change biodiversity loss and plastic pollution which take a huge toll on communities all around the world endangering their fundamental interests But can the lack of government action on these crises or action that worsens them amount to violations of human rights Many courts are grappling with this question as rights based litigation becomes increasingly common By focusing on climate change and plastic pollution as case studies this book examines the viability of rights claims when confronting planetary crises in courts From early attempts to pursue rights claims in response to planetary crises in the first decade of the 2000s to high profile court wins in such cases in the 2010s and the spread of such cases across dozens of jurisdictions by the 2020s rights claims in climate change and plastic pollution litigation have become a truly global phenomenon Through a systematic and in depth analysis of such litigation in more than thirty jurisdictions this book identifies factors that determine the viability of rights claims when confronting planetary crises It reveals that even

though not all litigation forums are equally favourable to such claims human rights can indeed be successfully invoked in different types of legal action This book will be of considerable interest to policymakers and legal scholars and practitioners as well as students who work in or study environmental and climate change law human rights law constitutional law and international and comparative law

Human Rights and Climate Change Siobhan Mcinerney-Lankford, Mac Darrow, Lavanya Rajamani, 2011 This Study explores arguments about the impact of climate change on human rights examining the international legal frameworks governing human rights and climate change and identifying the relevant synergies and tensions between them It considers arguments about i the human rights impacts of climate change at a macro level and how these impacts are spread disparately across countries ii how climate change impacts human rights enjoyment within states and the equity and discrimination dimensions of those disparate impacts and iii the role of international legal

frameworks and mechanisms including human rights instruments particularly in the context of supporting developing countries adaptation efforts The Study surveys the interface of human rights and climate change from the perspective of public international law It builds upon the work that has been carried out on this interface by reviewing the legal issues it raises and complementing existing analyses by providing a comprehensive legal overview of the area and a focus on obligations upon States and other actors connected with climate change The objective has therefore been to contribute to the global debate on climate change and human rights by offering a review of the legal dimensions of this interface as well as a survey of the sources of public international law potentially relevant to climate change and human rights in order to facilitate an understanding of what is meant in legal terms by human rights impacts of climate change and help identify ways in which international law can respond to this interaction
