Third Edition** Johann Joachim ESCHENBURG, 1844 **The Oxford Handbook of Egyptology** Ian Shaw, Elizabeth Bloxam, 2020 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant Authoritative yet accessible it is an invaluable resource for scholars students and general readers alike **Inside High-Rise Housing** Megan Nethercote, 2022-06-30 As cities sprawl skywards and private renting expands this compelling geographic analysis of property identifies high rise development s overlooked hand in social segregation and urban fragmentation **The Aramaic and Egyptian Legal Traditions at Elephantine** Alejandro F. Botta, 2009-06-25 This is a study of the interrelationships between the formulary traditions of the legal documents of the Jewish colony of Elephantine and the legal formulary traditions of their Egyptian counterparts The legal documents of Elephantine have been approached in three different ways thus far first comparing them to the later Aramaic legal tradition second as part of a self contained system and more recently from the point of view of the Assyriological legal tradition However there is still a fourth possible approach which has long been neglected by scholars in this field and that is to study the Elephantine legal documents from an Egyptological perspective In seeking the Egyptian parallels and antecedents to the Aramaic formulary Botta hopes to balance the current scholarly perspective based mostly upon Aramaic and Assyriological comparative studies **Manual of Classical Literature** Johann Joachim Eschenburg, 1878

Dynamics of Production in the Ancient Near East Juan Carlos Moreno Garcia,2016-10-11 The transition between the 2nd and the 1st millennium BC was an era of deep economic changes in the ancient Near East An increasing monetization of transactions a broader use of silver the management of the resources of temples through entrepreneurs the development of new trade circuits and an expanding private small scale economy transformed the role previously played by institutions such as temples and royal palaces The 17 essays collected here analyze the economic transformations which affected the old dominant powers of the Late Bronze Age their adaptation to a new economic environment the emergence of new economic actors and the impact of these changes on very different social sectors and geographic areas from small communities in the oases of the Egyptian Western Desert to densely populated urban areas in Mesopotamia Egypt was not an exception Traditionally considered as a conservative and highly hierarchical and bureaucratic society Egypt shared nevertheless many of these characteristics and tried to adapt its economic organization to the challenges of a new era In the end the emergence of imperial super powers Assyria Babylonia Persia and to a lesser extent Kushite and Saite Egypt can be interpreted as the answer of former palatial organizations to the economic and geopolitical conditions of the early Iron Age A new order where competition for the control of flows of wealth and of strategic trading areas appears crucial *The Open Shelf* ,1911
