How To Survive In Medicine Personally And Professionally:

So You Want to Be a Doctor? Kerry J Breen,2012-01-01 So You Want to Be a Doctor is written specifically for young people who are considering embarking on a medical degree as well as for those already enrolled This essential guide covers Prerequisites for admission into medical school at both undergraduate and graduate entry level What to expect as a qualified doctor in Australia today and what the Australian community expects in its doctors Life as a student from the application selection and interview process to the pressures of study advice on managing stress and distress and where to get help if needed The 18 medical schools in Australia their similarities and differences and particular focus or strengths The Australian health care system and career paths for medical graduates It includes advice about study methods financial support and balancing study with part time work and a social life as well as information that is relevant to specific groups such as Aboriginal and Torres Strait Islander students international students and students with a disability So You Want to Be a Doctor provides all the information a prospective medical student might need to decide on pursuing a career in medicine and to survive and thrive during the course of their study *How to Survive in Medicine* Jenny Firth-Cozens,2010-04-26

Medicine is a career that most people consider to be enviable Whatever one s criteria for a good job being a doctor ticks a lot of boxes doctors are needed respected well remunerated and can make a difference between life and death Increasingly doctors are experiencing stress depression and anxiety fuelled by the increasing demands of the health services and the lack of resources to support them Focussing on the causes symptoms and management of psychological problems experienced by doctors at all stages in their careers this book considers the difficulties and stressors of medicine as a career linking to studies that look at what interventions are successful in the workplace and offering various solutions Including A study based over 20 years of doctors stress factors Case histories to bring the subject to life Guidance on choosing a specialty dealing with difficult people stress and demands 37 A valuable resource both for trainers and doctors alike **New Coach:**

Reflections From A Learning Journey Paice, Lis,2013-03-01 Lis Paice s positivity shines through on every page of this book She writes in a beautifully simple and accessible style The book will be a tremendous introduction for those setting out on the same path as new coaches or for more experienced coaches who want to compare their journey with hers Dr John Launer Honorary Consultant and Senior Clinical Lecturer at the Tavistock Clinic London UK I love this book I ve not seen a book before that uses the experience of the one who is learning rather than just telling you how to do it It will be so useful in taking away the inevitable anxiety that comes when you are about to learn a new skill and learn it in public The author s honesty about her own pitfalls will help you know what to expect and the light bulb moments that she has as she progresses will undoubtedly light up the occasional bulb for you too It might be a book about learning but it s also a book that outlines the skills of coaching in a whole new way Jenny Firth Cozens Imperial College London UK This is a marvellous record of the journey recorded by a senior doctor educationalist as she strived to gain the skills of a coach Any new coach will find it

difficult to put down as it will resonate with many of their own first reflections She is open about her mistakes from the start On her first day of coach training she had a moment of kairos and she set her goal to train to the highest level which she continues to do Dr Rebecca Viney Coaching and Mentoring Lead London Deanery UK There are many books on coaching that give advice on what coaches should do This book is different Describing herself as a self critical learner Liz traces her journey into becoming a coach telling a uniquely honest story warts and all that all of us can learn from This is like reading someone s personal reflective diary rather than a recipe book on how to coach The result is both engaging and highly illuminating David E Gray Professor of Leadership and Organisational Behaviour University of Greenwich UK You can t summarize if you haven t been listening Coach and client share the encounter not the experience The better you get the less you say The client is the hero not the coach Coaching is a skill for life This frank account of one leader s journey to become a coach is a must have for beginner coaches It will strike a chord with anyone who has been on a similar journey or has just begun professional training discovering the disappointments triumphs and surprises of learning to coach and coming to their own personal insights Lis Paice s easy conversational style and rich supply of real life examples make this an enjoyable read even for the absolute beginner The questions she raises about coaching will also stimulate reflection for experienced coaches trainers and supervisors Topics include What coaching is all about How coaching differs from other ways of helping What the role of the coach entails Getting to grips with the principles of coaching Learning by experience why the rules matter Trying out different tools and techniques Finding ways of helping the client to new perspectives and insights Avoiding complacency

Rejuvenating Medical Education Alan Bleakley, Robert Marshall, 2017-08-21 Returning to Homer s Iliad and Odyssey for inspiration this book uses these epics as a medium through which we might think imaginatively about key issues in contemporary medicine and medical education These issues include doctors as heroes and the legacy of heroic medicine in an age of clinical teamwork collaboration and a more feminine medicine The authors challenge ingrained habits in medical education such as the way we characteristically train medical students to communicate with patients and colleagues the reduction of compassion to the skill of empathy the rote recital of the medical history as a song and the new vogue for resilience as response to increasing levels of stress and burnout in the profession A Homeric lens also shows new ways of thinking about translation of medical lingo into patients understanding the relatively high levels of anger and error shown in clinical interactions and modern phenomena such as whistleblowing in the face of unacceptable error or misbehaviour While exhaustion and burnout are becoming more common in medicine the authors ask if a more lyrical rather than epic and tragic stance might benefit medical work Drawing on a wealth of experience in the field the book promotes a new kind of medicine and medical education fit for the 21st century but envisages these through the ancient lens of Homer s two epics In the heroic glory elaborated in the Iliad and the themes of homecoming and hospitality set out in the Odyssey Homer provides a narrative arc that is a blueprint of modern medicine s development from a heroic endeavour to a contemporary collaborative

provision of hospitality where the hospital remains true to its name and doctors engage in work of care rather than fighting disease with the hospital as battleground *Intelligent Kindness* John Ballatt, Penelope Campling, Chris Maloney, 2020-02-20

A powerful examination of intelligently applied kindness in rehabilitating the welfare state particularly health and social care

Historical Memories in Culture, Politics and the Future Rahman Haghighat, 2014-01-14 This book is written to satisfy the individual's desire for intellectual stimulation to sow in the mind the seed of new ideas and involve the reader in productive debates. It covers culture history and the future raising questions presenting arguments and engaging the enquirer in reflection. It illustrates the relationship between past history and current social practices proposing the concept of compartmentalization of behaviour where history is understood to contribute to why there are so many displaced excesses amongst the English alongside an ethos of moderation why in a country with such high civility there is hooliganism why riots in English cities can be particularly violent why the country has the highest rate of teenage pregnancy in Europe why it lags behind many others in the early diagnosis of cancer and what can be done about this. The book also explores what affects us all globally the making of history the psychology of dictatorships the unconscious in history the development of new democracies the emerging psychosocial trends in the world to come the cognitive emotional and identity ethos of the evolving century and the future of history. Finally it identifies history's foundations and the fundamental human tendency which beyond the class interests of Marx and the search for recognition of Hegel motivates and perpetuates history itself.
