Loftus, 2012-10-10 For about two decades John W Loftus was a devout evangelical Christian an ordained minister of the Church of Christ and an ardent apologist for Christianity With three degrees in philosophy theology and philosophy of religion he was adept at using rational argumentation to defend the faith But over the years doubts about the credibility of key Christian tenets began to creep into his thinking By the late 1990s he experienced a full blown crisis of faith In this

honest appraisal of his journey from believer to atheist the author carefully explains the experiences and the reasoning process that led him to reject religious belief The original edition of this book was published in 2006 and reissued in 2008 Since that time Loftus has received a good deal of critical feedback from Christians and skeptics alike In this revised and expanded edition the author addresses criticisms of the original adds new argumentation and references and refines his presentation For every issue he succinctly summarizes the various points of view and provides references for further reading In conclusion he describes the implications of life without belief in God some liberating some sobering This frank critique of Christian belief from a former insider will interest freethinkers as well as anyone with doubts about the claims of religion

Persons, Humanity, and the Definition of Death John P. Lizza, 2006-02-01 In this riveting and timely work John P Lizza presents the first comprehensive analysis of personhood and humanity in the context of defining death Rejecting the common assumption that human or personal death is simply a biological phenomenon for biologists or physicians to define Lizza argues that the definition of death is also a matter for metaphysical reflection moral choice and cultural acceptance Lizza maintains that defining death remains problematic because basic ontological ethical and cultural issues have never been adequately addressed Advances in life sustaining technology and organ transplantation have led to revision of the legal definition of death It is generally accepted that death occurs when all functions of the brain have ceased However legal and clinical cases involving postmortem pregnancy individuals in permanent vegetative state those with anencephaly and those with severe dementia challenge the neurological criteria Is brain death really death Should the neurological criteria be expanded to include individuals in permanent vegetative state with anencephaly and those with severe dementia What metaphysical ethical and cultural considerations are relevant to answering such questions Although Lizza accepts a pluralistic approach to the legal definition of death he proposes a nonreductive substantive view in which persons are understood as constituted by human organisms This view he argues provides the best account of human nature as biological moral and cultural and supports a consciousness related formulation of death Through an analysis of legal and clinical cases and a discussion of alternative concepts of personhood Lizza casts greater light on the underlying themes of a complex debate

in their communities Grades 8-12 **Personality Development Theories and Practices** Dr. Lalith Kumar Dharavath, 2025-05-01 *The Myth of an Afterlife* Michael Martin, Keith Augustine, 2015-03-12 Because every single one of us will die most of us would like to know what if anything awaits us afterward not to mention the fate of lost loved ones Given the nearly universal vested interest in deciding this question in favor of an afterlife it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance But the evidence of our senses and the ever gaining strength of scientific evidence strongly suggest otherwise In *The Myth of an Afterlife: The Case against Life after Death* Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong comprehensive and up to date casebook of the chief arguments against an afterlife Divided into four separate sections this collection opens with a broad overview of the issues as contributors consider the strongest evidence of whether or not we survive death in particular the biological basis of all mental states and their grounding in brain activity that ceases to function at death Next contributors consider a host of conceptual and empirical difficulties that confront the various ways of surviving death from bodiless minds to bodily resurrection to any form of posthumous survival Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife heaven hell karmic rebirth and widely held ethical principles central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary *The Myth of an Afterlife: The Case against Life after Death* brings together a variety of fields of research to make that case including cognitive neuroscience philosophy of mind personal identity philosophy of religion moral philosophy psychical research and anomalistic psychology As the definitive casebook of arguments against life after death this collection is required reading for any instructor researcher and student of philosophy religious studies or theology It issues to raise provocative issues new to readers regardless of background from those who believe fervently in the reality of an afterlife to those who do not or are undecided on the matter
