Transnational Generations in the Arab Gulf States and Beyond Kyoko Matsukawa,Akiko Watanabe,Zahra R. Babar,2023-12-01 This book examines the recent migration phenomenon in the Arab Gulf states for work and residence It sheds light on the transnationality of diverse groups of migrants from different generations and unpacks how migrants multiple senses of belonging orientations and adaptive strategies have shaped contemporary migration in the Gulf region In turn the analysis presented here shows how the Arab Gulf states citizenship and educational policies affect second generation migrants in particular Through a series of fine grained ethnographic case studies the authors demonstrate the ways in which these second generation migrants construct their identities in relation to their putative home country in the Gulf as well as their complex relationship to their parents countries of origin This is what underpins the deeply transnational character of their lives choices and notions of belonging While migration scholars often situate these groups as temporary this does not in fact capture the reality of temporariness for the migrants themselves their children or their dependants The result is a complex and ongoing construction of identity that shapes the way of life for millions of migrants Relevant to scholars of migration and international studies particularly focused on the Middle East Transnational Generations in the Arab Gulf States and Beyond is also of interest to social scientists researching student mobility in higher education intergenerational families identity politics and globalisation

Developments in Cardiac Implantable Electronic Device Therapy: How can we improve clinical implementation? Mate Vamos,Alexander Benz,Gabor Duray,Julia W. Erath,2023-06-27 The use of cardiac implantable electronic devices CIEDs has substantially increased in the last decades They have a significant impact on reducing morbidity and mortality of patients suffering from cardiac arrhythmias and heart failure Several developments of technical issues have appeared over recent years to improve safety and efficacy However their role in daily clinical practice is still unclear For instance different leadless technologies such as leadless pacemakers subcutaneous defibrillators or wearables are only partly or not included in the current guideline recommendations There are also several attempts to improve clinical response to cardiac resynchronization therapy with multipoint or fusion optimized technologies it is however not clear which patients really benefit from these The same is true for novel conduction system pacing modalities His bundle pacing seems to be the most physiological but manually challenging compared to left bundle branch area pacing which latter restores only the physiologic activation of the left ventricle but may be easier to perform The classical indications for primary prophylactic ICD are also questioned based on some new study results highlighting the need for an improved more detailed and individual risk stratification for better patient selection We have important but somehow controversial study results regarding preventive antibiotic therapy incremental perioperative antibiotics vs antibiotic eluting envelope during CIED implantation Lead extraction tools are also expanding but randomized controlled trials regarding the best approach are completely missing in this field The importance of remote monitoring is also constantly growing especially in the current pandemic times the best way of patient selection needs however more research
