Annotated Bibliography of Quaternary Vertebrates of Northern North America Donna Naughton, Canadian Museum of Nature, 2003-01-01 This book focuses on highlights species mentioned locality geological age stratigraphic positions etc of nearly 1000 items published between 1821 and 2000 dealing with the remains of vertebrates that lived from about 2 million to 5000 years ago *Geological Survey Research, 1967, Chapter A*. Geological Survey (U.S.), 1967 A summary of recent significant scientific and economic results accompanied by a list of publications released in fiscal year 1967 a list of geologic and hydrologic investigations in progress and a report on the status of topographic mapping *Trees, Forested Landscapes and Grazing Animals* Ian D. Rotherham, 2013 In this comprehensive book the critical components of the European landscape forest parkland and other grazed landscapes with trees are addressed The book considers the history of grazed treed landscapes of large grazing herbivores in Europe and the implications of the past in shaping our environment today and in the future Debates on the types of anciently grazed landscapes in Europe and what they tell us about past and present ecology have been especially topical and controversial recently This treatment brings the current discussions and the latest research to a much wider audience The book breaks new ground in broadening the scope of wood pasture and woodland research to address sites and ecologies that have previously been overlooked but which hold potential keys to understanding landscape dynamics Eminent contributors including Oliver Rackham and Frans Vera present a text which addresses the importance of history in understanding the past landscape and the relevance of historical ecology and landscape studies in providing a future vision **Frozen in Time** Michael Oard, Oard Michael, 2004 Earth s past is littered with the mysterious and unexplained the pyramids Easter Island Stonehenge dinosaurs and the list goes on and on as science looks for clues to decipher these puzzles One such mystery surrounds the now extinct creature called the woolly mammoth Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period the Ice Age for many years and has come to some fascinating conclusions to help lift the fog engulfing the facts Some of the questions he addresses include What would cause the summer temperatures of the northern United States and European to plummet more

than 50 degrees Fahrenheit Why did mammoths become extinct across the entire earth at the same time as many other large mammals Why are the mammoth carcasses found generally in standing positions How could large lakes exist in what are today very dry desert like places What was the source of the abnormal of moisture necessary for heavy snow What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years In logical progression many other Ice Age topics are explained including super Ice Age floods ice cores man in the Ice Age and the number of ice ages This is one of the most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysterious about the Ice Age and the woolly mammoths Frozen in Time

Future Arctic Edward Struzik, 2015-02-03 In one hundred years or even fifty the Arctic will look dramatically different than it does today As polar ice retreats and animals and plants migrate northward the arctic landscape is morphing into something new and very different from what it once was While these changes may seem remote they will have a profound impact on a host of global issues from international politics to animal migrations In Future Arctic journalist and explorer Edward Struzik offers a clear eyed look at the rapidly shifting dynamics in the Arctic region a harbinger of changes that will reverberate throughout our entire world Future Arctic reveals the inside story of how politics and climate change are altering the polar world in a way that will have profound effects on economics culture and the environment as we know it Struzik takes readers up mountains and cliffs and along for the ride on snowmobiles and helicopters sailboats and icebreakers His travel companions from wildlife scientists to military strategists to indigenous peoples share diverse insights into the science culture and geopolitical tensions of this captivating place With their help Struzik begins piecing together an environmental puzzle How might the land s most iconic species caribou polar bears narwhal survive Where will migrating birds flock to How will ocean currents shift And what fundamental changes will oil and gas exploration have on economies and ecosystems How will vast unclaimed regions of the Arctic be divided A unique combination of extensive on the ground research compelling storytelling and policy analysis Future Arctic offers a new look at the changes occurring in this remote mysterious region and their far reaching effects

Contemporary Gay American Poets and Playwrights Emmanuel S. Nelson, 2003-06-30 Gay presence is nothing new to American verse and theater Homoerotic themes are discernible in American poetry as early as the 19th century and identifiably gay characters appeared on the American stage more than 70 years ago But aside from a few notable exceptions gay artists of earlier generations felt compelled to avoid sexual candor in their writings Conversely most contemporary gay poets and playwrights are free from such constraints and have created a remarkable body of work This reference is a guide to their creative achievements Alphabetically arranged entries present 62 contemporary gay American poets and dramatists While the majority of included writers are younger artists who came of age in the post Stonewall U S some are older authors whose work has continued or persisted into recent decades A number of these writers are well known including Edward Albee Harvey Fierstein and Allen Ginsberg Others such as Alan Bowne Timothy Liu and Robert O'Hara merit wider recognition Each entry is written by an expert contributor and includes a biography a discussion of major works and themes an overview of the author's critical reception and primary and secondary bibliographies
