# Howard\*Forage Feeder Operating Instructions

#### Introduction

The task of transporting silage from silo or clamp and distributing it along a feeding trough can be laborious as well as time consuming. The Howard Forage Feeder Kit has been designed to convert the Howard Rotaspreader\* into a feeder wagon with

# Description

Main components of the Forage Feeder Kit are a wered roller fitted at the lip of the open side of drum and extending along its entire length. This is driven by a vee belt running between pulleys fixed to the roller and rear end of the flail tube and prevents silage hanging up on the lip of the drum and falling on to the wheel.

Alongside the roller is a large reinforced nylon curtain in an adjustable metal frame which can be moved in or out to vary the distance between the roller and curtain,
