Learn Active Directory Management in a Month of Lunches Richard Siddaway, 2014-03-11 Summary Learn Active Directory Management in a Month of Lunches is a practical hands on tutorial designed for IT pros new to Active Directory It skips the theory and concentrates on the day to day administration tasks you need to know to keep your network running smoothly Just set aside an hour a day for a month lunchtime would be perfect and you'll be comfortable and productive with Active Directory before you know it About the Book At the heart of your Windows network is Active Directory the control center for administration security and other core management functions If you're new to Active Directory administration or if

you find yourself unexpectedly thrust into that role you'll need to get up to speed fast. Learn Active Directory Management in a Month of Lunches is a hands-on tutorial designed for IT pros new to Active Directory. Without assuming previous administration experience, the book starts by walking you through the most important day-to-day system management tasks. You'll learn how to administer AD both from the GUI tools built into Windows and by using PowerShell at the command line. Along the way, you'll touch on best practices for managing user access, setting group policies, automating backups, and more. This book assumes no prior experience with Active Directory or Windows administration. Examples are based in Windows Server 2012. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

What's Inside: ADM tasks you'll need every day; GUI and command-line techniques; Content tested by new administrators. Well-illustrated, clearly explained examples.

About the Author: Richard Siddaway is an experienced all-around Windows administrator with two decades of experience. He's the author of PowerShell in Practice and PowerShell and WMI and coauthor of PowerShell in Depth.

**Administration in a Month of Lunches** Don Jones, 2014-04-30

Summary: Learn SQL Server Administration in a Month of Lunches is the perfect way to get started with SQL Server operations, including maintenance, backup, and recovery, high availability, and performance monitoring. In about an hour a day over a month, you'll learn exactly what you can do and what you shouldn't touch. Most importantly, you'll learn the day-to-day tasks and techniques you need to keep SQL Server humming along smoothly. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

About the Book: Microsoft SQL Server is used by millions of businesses, ranging in size from Fortune 500s to small shops worldwide. Whether you're just getting started as a DBA supporting a SQL Server-driven application or you've been drafted by your office as the SQL Server admin, you do not need a thousand-page book to get up and running. Learn SQL Server Administration in a Month of Lunches is the perfect way to get started with SQL Server. This concise, easy-to-read book skips academic introductions and teaches you day-to-day techniques for maintenance, backup, and recovery, performance monitoring, and more. Each of the 21 short lessons gives you practical takeaways you'll use over and over.

What's Inside:

- Master the basics: indexes, logins, backup, recovery, and more.
- Learn what you can and cannot do when supporting a third-party application.
- Monitor and improve performance.

*Practical Automation with PowerShell* Matthew Dowst, 2023-05-09 Take PowerShell beyond simple scripts and build time saving automations for your team your users and the world In Practical Automation with PowerShell you will learn how to Build PowerShell functions to automate common and complex tasks Create smart automations that are adaptable to new challenges Structure your code for sharing and reusability Store and secure your automations Execute automations with Azure Automation Jenkins Task Scheduler and Cron Share your automations with your team and non technical colleagues Store and retrieve data credentials and variables Use source control solutions to maintain and test code changes Provide front end UI solutions for PowerShell automations

Practical Automation in PowerShell reveals how you can use PowerShell to build automation solutions for a huge number of common admin and DevOps tasks. Author Matthew Dowst uses his decades of experience to lay out a real blueprint for setting up an enterprise scripting environment with PowerShell. The book goes beyond the basics to show you how to handle the unforeseen complexities that can keep automations from becoming reusable and resilient. From the console to the cloud, you'll learn how to manage your code, avoid common pitfalls, and create sharable automations that are adaptable to different use cases.

**About the Technology:** The PowerShell scripting language is a force multiplier giving you programmatic control over your whole data center. With this powerful tool, you can create reusable automations that radically improve consistency and productivity on your Ops team. This book shows you how to design, write, organize, and deploy scripts to automate operations on systems of all sizes, from local servers to enterprise clusters in the cloud.

**About the Book:** Practical Automation with PowerShell: Effective scripting from the console to the cloud shows you how to build PowerShell automations for local and cloud systems. In it, you'll find tips for identifying automatable tasks, techniques for structuring and managing scripts, and lots of well-explained example code. You'll even learn how to adapt existing scripts to new use cases and empower non-technical users through easy-to-understand SharePoint frontends.

**What's Inside:** Structure PowerShell code for sharing and reusability. Store and secure your automations. Execute automation with Azure Automation, Jenkins Task Scheduler, and Cron. Store and retrieve data, credentials, and variables. Use source control solutions to maintain and test code changes.

**About the Reader:** For sysadmin and IT professionals who manage backend systems.

**About the Author:** Matthew Dowst has over 15 years of experience in IT management and consulting.
