Its mantra is that the best low budget action moviemakers must visualize the end product first in order to reverse engineer the least expensive way to get there. Readers will learn how to integrate visual effects into every aspect of filmmaking before filming during filming and with in camera shots and with computers in postproduction. Throughout the book the author makes specific references to and uses popular action movies both low and big budget as detailed examples including *El Mariachi* *La Femme Nikita* *Die Hard* and *Terminator 2*.
