mathematics courses Each chapter features exercises on the mathematics and students can have fun practicing the tricks
 Mathematics Magazine Teixeira and Park present over 60 different magic tricks while introducing students to high level math
 areas Readers will learn really interesting ideas that will better prepare them for future courses and help them finding areas
 they might want to study deeper And as a side effect students will learn amazing magic tricks century old secrets and details
 from famous magicians and mathematicians The material was written to quickly present key concepts in several
 mathematical areas in direct way Little or no proficiency in math is assumed In fact students do not require any Calculus
 knowledge And since chapters are almost independent from each other this book also work as introduction to several other
 courses Topics covered include mathematical proofs probability abstract algebra linear algebra mathematical computing
 number theory coding theory geometry topology real analysis numerical analysis and history of math MatheMazing! The
 Beauty of Mathematics Shehab Khan, 2016-12-29 Never really liked maths Or love it so much This book is just for you This
 book encapsulates around ten different of the most famous mathematical problems in the history of mathematics Shehab
 breaks these problems down into several components to help YOU understand the fun part of mathematics Many people do
 not like mathematics It may be due to the way mathematics is taught or the way the curricula is designed Students find high
 school mathematics quite unexciting as most of it is about learning the tools without understanding how these tools could
 ever help with the real world problems Get this book today to explore YOUR love for mathematics Microcomputing , 1983
