Mathematics of Climate Modeling Valentin P. Dymnikov,Aleksander N. Filatov,2012-12-06 The present monograph is dedicated to a new branch of the theory of climate which is titled by the authors Mathematical Theory of Climate The foundation of this branch is the investigation of climate models by the methods of the qualitative theory of differential equations In the Russian edition the book was named Fundamentals of the Mathematical Theory of Climate Respecting the recommendations of Wayne Yuhasz we are truly grateful to him for this advice we named the English edition of the book Mathematics of Climate Modelling This title appears to be more appropriate since the constructive results of the theory are at present preliminary and have not been fully tested with experiments in climate modelling This branch of science is yet developing and its practical results will be obtained only in the near future Nevertheless we want to keep the terminology which we have used in the introduction to the Russian edition of the book since the authors hope that this term will be accepted by the scientific community for identification of a given branch of climate theory On preparing the English edition new ideas were established connecting some significant new research results obtained by the author We are deeply grateful to G Marchuk for continual encouragement of this scientific enterprise and fruitful discussions to our young colleagues A Gorelov E Kazantsev A Gritsun and A *Mathematics of Climate Modeling* Valentin P Dymnikov,Aleksander N
