

# HOW STANDARDIZED TESTS ARE CREATED

FOR YOUR CHILD

The standardized test your child takes is the product of about 3 years of development involving thousands of educators and rigorous research.

## STATE STANDARDS

Educators and administrators in each state carefully construct a set of content standards that specify what a student should know by the end of the school year.

## QUESTION CREATION

Education experts create questions that test the state's content standards. These questions range from multiple-choice questions and essay prompts to tasks and situations.

Each state selects a testing partner

Pearson created **49,795** testing questions in 2011

## REVIEW

All questions are reviewed multiple times by independent pros, state education experts, and classroom teachers. Everyone works together to verify that there is only one correct answer to each question, and that they address state standards.

Pearson held **1,300** educator meetings over three years

## FIELD TESTING

The questions are then field tested with groups of students. A field test is a test of each question before it can be used for student scores. Only field test questions that perform well and are fair are accepted for use on a future test.

Pearson field tested **30,731** questions in 2011

## FINALIZED

After this extensive, collaborative process the final test is assembled. A mix of challenging and easy questions are used to get a good range of knowledge and skill assessment. The test isn't final until everyone involved verifies that it is an effective measurement of what students have learned.

In 2011, Pearson constructed **4,332** unique test forms

## PROFICIENCY

Lastly, states make decisions about how well students must perform to pass or be proficient. Performance standards give a frame of reference for understanding test scores. They help parents, educators, and administrators clearly understand how well students are learning.

**THOUSANDS OF EDUCATORS INVOLVED**
