What's Wrong with the United Nations and How to Fix it

Thomas G. Weiss, 2009 Six decades after its establishment the United Nations and its system of related agencies and programs is perpetually in crisis While World War I and World War II gave rise to ground breaking efforts at international organization in 1919 and 1945 the UN today seems ill equipped to deal with modern challenges to world order Neither the end of the Cold War nor the aftermath of 9 11 has led to the creation of a next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In this succinct and illuminating analysis Thomas G Weiss takes a diagnosis and cure approach to the world organization s inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN s many overlapping jurisdictions agencies and bodies and the ever demanding challenges of bureaucracy and leadership The second half examines how to mitigate these maladies and points the way to a more ideal world in which the UN s institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible This indispensable book will spark debate amongst students scholars and policy makers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and international cooperation

Law and Practice of the United Nations Simon Chesterman, Ian Johnstone, David Malone, 2016 This book combines primary materials with expert commentary demonstrating the interaction between law and practice in the UN organisation as well as the possibilities and limitations of multilateral institutions in general Each chapter begins with a short introductory essay by the authors that describes how the documents that follow illustrate a set of legal institutional and political issues relevant to the practice of diplomacy and the development of public international law through the United Nations This second edition updates the materials in the first edition and introduces new features that reflect a changing global landscape

The Oxford Handbook on the United Nations Thomas George Weiss, Sam Daws, 2008-11-13 This major new handbook provides the definitive and comprehensive analysis of the UN and will be an essential point of reference for all those working on or in the organization

Individual Agency and Policy Change at the United Nations

Ingvild Bode,2015-03-24 This book highlights how temporary international civil servants play a crucial role in initiating processes of legal and institutional change in the United Nations system These individuals are the missing creative elements needed to fully understand the emergence and initial spread of UN ideas such as human development sovereignty as responsibility and multifunctional peacekeeping The book Shows that that temporary UN officials are an actor category which is empirically crucial yet usually neglected in analytical studies of the UN system Focussing on these particular individual actors therefore allows for a better understanding of complex UN decision making Demonstrates how these civil servants matter looking at what their agency is based on Offering a new and distinctive model Bode seeks to move towards a comprehensive conceptualisation of individual agency which is currently conspicuous for its absence in many theoretical approaches that address policy change Uses three key case studies of international civil servants Francis Deng Mahbub ul Haq and Marrack Goulding to explore the possibilities of this specific group of UN individuals to act as agents of change and thereby test the prevailing notion that international bureaucrats can only act as agents of the status quo This book will be of great interest to students and scholars of international organizations and the United Nations

Preventing and Countering Violent Extremism in a Postcolonial Context Fabrizio Leonardo Cuccu,2025-08-01 This book examines how global policies designed to prevent extremism have shaped religious and security governance in Tunisia in recent years focusing on local programmes for training imams By tracing the evolution of security measures in Tunisia from the colonial era to today this book highlights how transnational security policies particularly those promoted after 2011 have reinforced state control over religion While many studies explore religion s role in politics this work shows how

international security agendas influence religious institutions and discourse locally Through interviews with religious leaders and civil society organizations this book uncovers how Tunisian institutions have strategically used international counter extremism frameworks to justify increased security measures It also sheds light on the evolving role of imams as security actors By linking past and present this book challenges the idea that counter extremism policies are neutral showing instead how they often echo colonial era policing This book will be of interest to students of countering violent extremism securitization African studies and International Relations in general Stealth Conflicts Virgil Hawkins,2016-12-05 Many of the world s deadliest conflicts are largely ignored becoming off the radar stealth conflicts How can this be possible in a world with unprecedented levels of access to information and unprecedented levels of attention and resources being devoted to foreign affairs Virgil Hawkins reveals and explains the highly distorted and assimilated responses to foreign conflicts by major actors in the world He examines the agenda setting processes of policy makers the media the public and academics in relation to foreign conflicts Using a vast array of detailed examples he systematically unravels the internal dynamics and external influences experienced by these actors and in so doing he brings the academic agenda into the loop of the conflict response agenda setting process for the first time With agenda setting research tending to focus on the question of why a response to a particular event or issue occurred this book furthers research by focusing equally on why a response did not occur The volume is critically important in understanding why actors do and do not respond to foreign conflicts
