Advanced Materials for a Sustainable

Environment Naveen Kumar, Peter Ramashadi Makgwane, 2022-12-30 This book summarizes recent and critical aspects of advanced materials for environmental protection and remediation. It explores the various development aspects related to environmental remediation including design and development of novel and highly efficient materials aimed at environmental sustainability. Synthesis of advanced materials with desirable physicochemical properties and applications is covered as well. Distributed across 13 chapters, the major topics covered include sensing and elimination of contaminants and hazardous materials via advanced materials along with hydrogen energy, biofuels, and CO₂ capture technology. Discusses the development in design of synthesis process and materials with sustainable approach. Covers removal of biotic and abiotic wastes from the aqueous systems. Includes hydrogen energy and biofuels under green energy production. Explores removal of environmental soil and air contaminants with nanomaterials. Reviews advanced materials for environmental remediation in both liquid and gas phases.

Computing Statistics under Interval and Fuzzy Uncertainty Hung T. Nguyen, Vladik Kreinovich, Berlin Wu, Gang Xiang, 2011-11-17 In many practical situations we are interested in statistics characterizing a population of objects, e.g., in the mean height of people from a certain area. Most algorithms for estimating such statistics assume that the sample values are exact. In practice, sample values come from measurements and measurements are never absolutely accurate. Sometimes we know the exact probability distribution of the measurement inaccuracy, but often we only know the upper bound on this inaccuracy. In this case we have interval uncertainty, e.g., if the measured value is 1.0 and inaccuracy is bounded by 0.1, then the actual unknown value of the quantity can be anywhere between 0.9 and 1.1. In other cases the values are expert estimates and we only have fuzzy information about the estimation inaccuracy. This book shows how to compute statistics under such interval and fuzzy uncertainty. The resulting methods are applied to computer science, optimal scheduling of different processors, information technology, maintaining privacy, computer engineering, design of computer chips, and to data processing in geosciences, radar imaging, and structural mechanics.

CAD84 Joanna Wexler, 2013-10-22 CAD84 6th International Conference and Exhibition on Computers in Design Engineering is a collection of 64 conference papers that covers a wide range of topics on computer-aided design (CAD) and CAD/CAM, including CAD process, plant designs, techniques, drafting systems, electronics, geometric design, kinematics, mechanical engineering, solid modelling, and structures. The book starts by describing the progress that has been made in hardware and software. The text continues by presenting papers about interactive systems for the design and production of computer programs, an algorithmic language for the definition and manipulation of drawings, and a software tool to enable application dialog input to be developed for new or existing programs with or without problem-oriented language. Papers on the design of a drawing system that consists of a language kernel for tailoring the system to support various styles and practices, and on an automated drawing and cost estimation program for platform frame construction named HOUSE24, are

also presented The book also discusses HILO 2 which is a single coherent system for design verification fault simulation and test vector generation The text will benefit both students and professionals using CAD , **The Practice of Statistics** Daren S. Position, Navigation, and Timing Technologies in the 21st Century Y. Jade Morton, Frank van Diggelen, James J. Spilker, Jr., Bradford W. Parkinson, Sherman Lo, Grace Gao, 2020-12-17 Covers the latest developments in PNT technologies including integrated satellite navigation sensor systems and civil applications Featuring sixty four chapters that are divided into six parts this two volume work provides comprehensive coverage of the state of the art in satellite based position navigation and timing PNT technologies and civilian applications It also examines alternative navigation technologies based on other signals of opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications Volume 1 of Position Navigation and Timing Technologies in the 21st Century Integrated

Satellite Navigation Sensor Systems and Civil Applications contains three parts and focuses on the satellite navigation systems technologies and engineering and scientific applications. It starts with a historical perspective of GPS development and other related PNT development. Current global and regional navigation satellite systems GNSS and RNSS, their interoperability, signal quality, monitoring, satellite orbit and time synchronization and ground and satellite based augmentation systems are examined. Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath rich urban environment in handling spoofing and interference and in ensuring PNT integrity are addressed. A section on satellite navigation for engineering and scientific applications finishes off the volume. Volume 2 of Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications consists of three parts and addresses PNT using alternative signals and sensors and integrated PNT technologies for consumer and commercial applications. It looks at PNT using various radio signals of opportunity, atomic clock, optical laser, magnetic field, celestial MEMS and inertial sensors as well as the concept of navigation from Low Earth Orbiting LEO satellites. GNSS/INS integration, neuroscience of navigation and animal navigation are also covered. The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping, precision agriculture, wearable systems, automated driving, train control, commercial unmanned aircraft systems, aviation and navigation in the unique Arctic environment. In addition, this text serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects. Includes chapters that focus on the latest developments in GNSS and other navigation sensors, techniques and applications. Illustrates interconnecting relationships between various types of technologies in order to assure more protected, tough and accurate PNT. Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications will appeal to all industry professionals, researchers and academics involved with the science, engineering and applications of position navigation and timing technologies. pnt21book.com

Unconstrained Face Recognition Shaohua Kevin Zhou, Rama Chellappa, Wenyi Zhao, 2006-10-11. Face recognition has been actively studied over the past decade and continues to be a big research challenge. Just recently, researchers have begun to investigate face recognition under unconstrained conditions. Unconstrained Face Recognition provides a comprehensive review of this biometric, especially face recognition from video, assembling a collection of novel approaches that are able to recognize human faces under various unconstrained situations. The underlying basis of these approaches is that unlike conventional face recognition algorithms, they exploit the inherent characteristics of the unconstrained situation and thus improve the recognition performance when compared with conventional algorithms. Unconstrained Face Recognition is structured to meet the needs of a professional audience of researchers and practitioners in industry. This volume is also suitable for advanced level students in computer science.

Handbook of Nanostructured Materials and Nanotechnology, Five-Volume Set Hari Singh Nalwa, 1999-10-29

Nanostructured materials is one of the hottest and fastest growing areas in today's materials science field along with the related field of solid state physics. Nanostructured materials and their based technologies have opened up exciting new possibilities for future applications in a number of areas including aerospace, automotive, x-ray technology, batteries, sensors, color imaging, printing, computer chips, medical implants, pharmacy and cosmetics. The ability to change properties on the atomic level promises a revolution in many realms of science and technology. Thus this book details the high level of activity and significant findings available for those involved in research and development in the field. It also covers industrial findings and corporate support. This five volume set summarizes fundamentals of nano science in a comprehensive way. The contributors enlisted by the editor are at elite institutions worldwide.

Key Features: Provides comprehensive coverage of the dominant technology of the 21st century. Written by 127 authors from 16 countries making this truly international. First and only reference to cover all aspects of nanostructured materials and nanotechnology.

Photochemistry Angelo Albini, Elisa Fasani, 2013-08-06

Reviewing photo induced processes that have relevance to a wide ranging number of academic and commercial disciplines and interests covering chemistry, physics, biology and technology, this series is essential reading for anyone wishing to keep abreast of the current literature. Now in its 41st volume and with contributions from across the globe, this series continues to present an accessible digest of current opinion and research in all aspects of photochemistry. More than 100 years have passed since Ciamician first talked of solar energy conversion and photoresponsive materials and these topics are among those reviewed in this Specialist Periodical Report. Other chapters examine the potential for photo click chemistry, the photophysics of transition metal complexes and excited state dynamics in conjugated polymers. This specialist periodical report presents critical and comprehensive reviews of the last 12 months of the literature and is an essential resource for anyone working at the cutting edge of photochemistry.
