1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the target audience and their requirements.
2. Once a market need is identified, the next step is to develop a concept. This involves brainstorming ideas and creating a preliminary design that addresses the identified need.
3. The third step is to create a prototype. This involves building a physical model of the product to test its functionality and gather feedback from potential users.
4. After the prototype is built, the next step is to conduct a feasibility study. This involves evaluating the technical, financial, and market viability of the product.
5. The final step is to launch the product. This involves marketing the product, distributing it, and monitoring its performance in the market.
