Law Of Accumulation And Breakdown Of The Capitalist System:

The Law of Accumulation and Breakdown of the Capitalist System Henryk Grossmann, 1992-03-20 Henryk Grossmann's influential work provides the key to a fuller understanding of Marx's theory of crisis

The Law of Accumulation and Breakdown of the Capitalist System, 1992 **The Law of Accumulation and Breakdown of the Capitalist System** Henryk Grossmann, 1992 Law of Accumulation first published in German in 1929 is one of the seminal works of Marxian political economy both in its method and in substantive theory Reissued in the original German in 1970 Grossmann's work has also appeared in Japanese but there has never until now been an English edition This is an important volume it will be essential reading for anyone with an interest in the development of Marxian economic theory Science Society

The Law of Accumulation and Breakdown of the Capitalist System Henryk Grossman, 1992-03-27 A classic work in the Marxist canon on political economy *Henryk Grossman Works, Volume 3* Henryk Grossman, 2021-11-01 Long awaited the first full translation of Henryk Grossman's The Law of Accumulation and Breakdown of the Capitalist System Being also a Theory of Crisis has been published in English It was the most important influential and yet most denounced of Grossman's works and recovers not only Marx's primary explanation of capitalism's economic crises and breakdown tendency but also his method in Capital

Declining Profitability and the Evolution of the US Economy Ascension Mejorado, Manuel Roman, 2023-09-01 The 1970s were a pivotal decade for the US economy deindustrialization broke the power of the labor unions and made possible the redistribution of income in favor of corporate profits globalization and offshore investments opened alternatives to domestic nonfinancial capital accumulation domestic productivity growth declined and labor saving technology empowered superstar corporations to rapidly gain market share This book argues that the persistent fall in profitability leading to the stagflation crisis was a direct result of the transition from the Fordist phase of capital accumulation based on large scale manufacturing to the neoliberal phase and the rising power of finance Neoliberalism restored the power of rentiers but not the profit rates of nonfinancial corporations Falling accumulation rates weakened the growth capacity of nonfinancial corporate firms and secular stagnation became the norm Neo Keynesian economists Larry Summers and Paul Krugman explained the persistence of secular stagnation with arguments borrowed from Alvin Hansen in the 1930s such as the declining birth rate or the falling relative prices of investment goods hence a shortfall of demand In the Classical paradigm profitability drives capital accumulation and falling profitability slows down growth As the accumulation rate declined and the capacity growth diminished breakdowns in supply links due to the COVID 19 pandemic prevented large infusions of purchasing power to find matching levels of supply hence the stagflation crisis returned The book will be a great asset to researchers and scholars interested in the development of Classical Political Economy concerning issues related to inflation stagnation growing inequality and the next phase of neoliberalism Henryk Grossman Works Henryk Grossmann, 2019 Long awaited the first full translation of Henryk Grossman's The Law of accumulation and breakdown of the

capitalist system being also a theory of crisis has been published in English It was the most important influential and yet most denounced of Grossman s works and recovers not only Marx s primary explanation of capitalism s economic crises and breakdown tendency but also his method in Capital Adorno's Critique of Political Economy Dirk Braunstein,2022-11-21 To this day there persists a widespread assumption that Adorno s references to Marx and especially to Marx s critique of political economy represent a relic from an early and short lived stage of Adorno s theoretical development On the basis of relevant and largely unpublished textual sources this book refutes this thesis while showing that the centre of Adorno s critical theory of society is occupied by a critique not only of political economy but of economy in general The End of Capitalism Ted Reese,2022-05-27 Henryk Grossman is a name most socialists or students of political and social theory let alone the mass of working people around the world have probably never heard of Yet Grossman a Polish Jew born in 1881 deserves recognition as the most sophisticated defender of Karl Marx s theory of capitalism s inevitable collapse With capitalism sinking into its deepest ever crisis Grossman s neglected work must be revisited and popularised Is capitalism entering its final breakdown **The Bewitched World of Capital** Giacomo Marra Mao,2023-02-13 Capital is a chameleon that assumes different guises while maintaining the same logic exploiting crisis as an opportunity for regeneration Yet each transformation opens a passage for radical conflict and new revolutionary theories and subjects This is particularly true of the critical passage from the 1920s to the 1930s which Giacomo Marra Mao presents as an incandescent laboratory of theoretical and practical transformations and fierce confrontations Moving from Austro Marxism to Frankfurt School Critical Theory from Hilferding to Grossmann and Max Weber to Carl Schmitt The Bewitched World of Capital shows how the Political was remade in the passage from free market capitalism to mass society throwing new light on forms of domination and conflict that also traverse our present *The Alternative Austrian Economics* John E. King,2019-12-27 For most economists Austrian economics refers to a distinct school of thought originating with Mises and Hayek and characterised by a strong commitment to free market liberalism This innovative book explores an alternative Austrian tradition in economics Demonstrating how the debate on the economics of socialism began in Austria long before the 1930s it analyses the work and impact of many leading Austrian economists through a century of Austrian socialist economics **The Frankfurt School and the Challenge of Fascism** Claudio Corradetti,2025-10-14 Fascism is a well defined historical phenomenon but its political ideological offshoots have extended into today s democracies How should we understand the mimetic and dissimulating capacity of fascism Starting from the analyses of the exponents of the first Frankfurt School in their rethinking of the Marxian relationship of structure and superstructure this study considers how fascism may be defined as a specific organization of power together with a form of economic planning accompanied by a masochistic propensity to power Drawing on archival research at the Horkheimer and Marcuse Archive in Frankfurt the author guides us through unpublished documents of the Institute of Social Research in the years 1938 1939 concerning the plan to formulate a theory on fascism

This was never produced as a single work allowing space instead to the flourishing of different contributions The objective of this book is to provide an internal systemic reading of fascism finding points of mutual integration among critical theorists whenever possible while revealing irreconcilable divergencies when necessary This topical book will be of interest to academics and researchers working in the areas of philosophy the history of ideas legal philosophy critical theory economics and political science

The Legacy of Ernest Mandel Gilbert Achcar,1999 Ernest Mandel 1923 1995 was a member of what is now a very rare breed he was a theorist of an activist Marxism Leader of the international Trotskyist movement lifelong revolutionary and scholar of world renown Mandel was one of those few individuals who combined the untiring activism of a political leader with intellectual work that commands the respect of the academy

Rosa Luxemburg T. Kowalik,2014-12-17 The purpose of this translated volume Tadeusz Kowalik s book is to examine Rosa Luxemburg s contribution to economic theory The essential subject matter is the dependence of capital accumulation on effective demand the dependence of economic growth on specific capitalist barriers to growth

Henryk Grossman and the Recovery of Marxism Rick Kuhn,2007 The first comprehensive English language Grossman biography

The New Reformism and the Revival of Karl Kautsky Douglas Greene,2024-06-06 This text offers an authoritative historiography of German socialist theorist Karl Kautsky and his impact on debates about the Russian Revolution and the contemporary left Known as the Pope of Marxism Douglas Greene examines the totality of Kautsky s political career and dissects the fundamental opportunism and passive radicalism that defined his Marxism He later examines the most substantive Marxist critics of Kautsky namely Rosa Luxemburg V I Lenin and Leon Trotsky while offering a critical assessment of the work produced by scholars and activists Lars Lih Eric Blanc and Mike McNair seeking to revive Kautsky The New Reformism and the Revival of Karl Kautsky is an important addition to scholarship on the subject and a valuable resource for those interested in the Russian Revolution German politics socialism Marxism and contemporary left wing debates

Catastrophism Sasha Lilley,David McNally,Eddie Yuen,James Davis,2012-10-05 We live in catastrophic times The world is reeling from the deepest economic crisis since the Great Depression with the threat of further meltdowns ever looming Global warming and myriad dire ecological disasters worsen with little if any action to halt them their effects rippling across the planet in the shape of almost biblical floods fires droughts and hurricanes Governments warn that there is no alternative to the bitter medicine they prescribe or risk devastating financial or social collapse The right whether religious or secular views the present as catastrophic and wants to turn the clock back The left fears for the worst but hopes some good will emerge from the rubble Visions of the apocalypse and predictions of impending doom abound Across the political spectrum a culture of fear reigns Catastrophism explores the politics of apocalypse on the left and right in the environmental movement and examines why the lens of catastrophe can distort our understanding of the dynamics at the heart of these numerous disasters and fatally impede our ability to transform the world Lilley McNally Yuen and Davis probe the reasons why catastrophic thinking is so

prevalent and challenge the belief that it is only out of the ashes that a better society may be born The authors argue that those who care about social justice and the environment should jettison doomsaying even as it relates to indisputably apocalyptic climate change Far from calling people to arms they suggest catastrophic fear often results in passivity and paralysis and at worst reactionary politics

The Unfinished System of Karl Marx Judith Dellheim, Frieder Otto Wolf, 2018-04-13 This book examines what we can gain from a critical reading of Marx's final manuscript and his conclusion of the systematic presentation of his critique which was the basis for Engels's construction of the third volume of his infamous *Capital* The text introduces the reader to a key problem of Marx's largely implicit epistemology by exploring the systematic character of his exposition and the difference of this kind of systematicity from Hegelian philosophical system construction The volume contributes to establishing a new understanding of the critique of political economy as it has been articulated in various debates since the 1960s especially in France Germany and Italy and as it had already been initiated by Marx and some of his followers with Rosa Luxemburg in a key role All the chapters are transdisciplinary in nature and explore the modern day relevance of Marx's and Luxemburg's theoretical analysis of the dominance of the capitalist mode of production

Corporate and Social Transformation of Money and Banking S. Mouatt, C. Adams, 2010-10-29 As the real economy is increasingly digitalized banking lags behind It is thus not well placed to support the new economy The book provides some perspective on the changes taking place identifying the systemic weaknesses in the traditional financial infrastructure and proposing some radical rethinking to address systemic financial instability

Rudolf Hilferding Judith Dellheim, Frieder Otto Wolf, 2021-02-01 This edited volume is focused on Hilferding's major work *Finance Capital* In revisiting this influential book from a methodological point of view both historical and intellectual this book affirms Hilferding's place in the Marxist tradition Hilferding's ideas are used to criticise incumbent approaches in economics and enrich existing discussions and debates about the nature of modern capitalism In doing so this book highlights the importance of Hilferding's work in analysing and understanding modern capitalism and corporate developments The volume has contributions from a range of expert scholars addressing various aspects of Hilferding's arguments It elaborates on Hilferding's central idea on the political economy as well as its historical context and its relation to Marx Contributors move on to criticize Hilferding's views on the political economy and politics in general This book is relevant to those interested in the political economy the history of economic thought and European politics
