The Routledge International Handbook of Violence

Studies Walter S. DeKeseredy, Callie Marie Rennison, Amanda K. Hall-Sanchez, 2018-10-30 Violence is a serious public health problem. The number of violent deaths tells only part of the story and many more survive violence and are left with permanent physical and emotional scars. Violence also erodes communities by reducing productivity, decreasing property values, and disrupting social services. In recent years, scholars have broadened their definitions of violence beyond the realm of interpersonal harms such as murder, armed robbery, and male to female physical and sexual assaults in intimate relationships to include behaviors often ignored by the criminal justice system such as human rights violations, racism, psychological abuse, state terrorism, environmental violations, and war. Guided by this broader definition of violence, this handbook offers state-of-the-art research in the field and brings together international experts to discuss empirical, theoretical, and policy issues.

Agricultural and Climate Change Adaptation Law in Africa Habib Sani Usman, 2025-02-17 This book presents an analysis of climate change and agricultural laws in Kenya, Nigeria, and South Africa in order to determine whether they adequately addressed the concept of agricultural adaptation. Agriculture is one of the sectors of the economy that is contributing to climate change, and at the same time, the sector is heavily impacted by climate change. Therefore, agricultural adaptation is required. Focusing on three countries, this book provides a novel comparative examination of how and to what extent the law promotes agriculture-focused adaptation in these countries. The role of the law in addressing issues such as water management strategies, soil conservation methods, and crop production methods is discussed. This book identifies gaps in the regulatory frameworks for agricultural adaptation and highlights the lack of adaptive capacity of African agriculture due to weak or non-existing legal frameworks. It discusses ways to remedy these gaps through specific on-farm adaptation strategies, legislative amendments to consolidate all relevant national climate change-related policies and laws with agricultural policies and laws that have relevant provisions on adaptation as medium-term solutions, and the development of a specific framework law for agriculture-focused adaptation incorporating essential agricultural adaptation strategies. Such laws could perhaps be enacted as long-term solutions to the regulatory gaps. This book will be of great interest to students and scholars of law, climate change, food, and agriculture, sustainable development, and African studies.
