Laws Of Fear Beyond The Precautionary Principle The Seeley Lectures:

Laws of Fear Cass R. Sunstein, 2005-03-31 Instead of adopting the Precautionary Principle Professor Sunstein argues for three steps a narrow Anti Catastrophe Principle designed for the most serious risks close attention to costs and benefits and an approach called libertarian paternalism designed to respect freedom of choice while also moving people in directions that will make their lives go better He also shows how free societies can protect liberty amidst fears about terrorism and national security BOOK JACKET

Contemporary Issues in Environmental Law Yumiko Nakanishi, 2016-01-28 This book presents a variety of articles on contemporary issues in environmental law by eminent university professors of environmental law international public law European Union law and comparative law in Europe and Japan It is the first book in the field of environmental law based on the results of international conferences and research activities supported by the European Union delegation in Japan Current essential and global topics such as principles of environmental law climate change biodiversity ethics pertaining to animal rights nuclear safety regime after Fukushima environmental impact assessments protecting international waters genetically modified organisms and implementing international instruments and EU rules at the national level are discussed in light of the 2009 Treaty of Lisbon and other recent international treaties by comparing the approaches taken by the EU European countries and Japan As environmental law is not just a national issue but also a global one it is important to understand and analyse various aspects of current environmental issues This book is a response to such needs and represents the joint work of five Japanese and four European two German and two Italian professors who have succeeded in creating something that is both unique and remarkable

[The Reporter's Handbook on Nuclear Materials, Energy & Waste Management](#) Michael R. Greenberg, Bernadette M. West, Karen W. Lowrie, Henry J. Mayer, 2009-04-24 An essential reference for journalists activists and students this book presents scientifically accurate and accessible overviews of 24 of the most important issues in the nuclear realm including health effects nuclear safety and engineering TMI and Chernobyl nuclear medicine food irradiation transport of nuclear materials spent fuel nuclear weapons global warming Each brief is based on interviews with named scientists engineers or administrators in a nuclear specialty and each has been reviewed by a team of independent experts The objective is not to make a case for or against nuclear related technologies but rather to provide definitive background information The approach is based on that of The Reporter's Environmental Handbook published in 1988 which won a special award for journalism from the Sigma Delta Chi Society of professional journalists Other features of the book include a glossary of hundreds of terms an introduction to risk assessment environmental and economic impacts and public perceptions an article by an experienced reporter with recommendations about how to cover nuclear issues quick guides to the history of nuclear power in the United States important federal legislation and regulations nuclear position statements and key organizations print and electronic resources

Terror and Consent Philip Bobbitt, 2013-04-04 The wars against terror have begun but it will take some time before the nature and

composition of these wars is widely understood The objective of these wars is not the conquest of territory or the silencing of any particular ideology but rather to secure the necessary environment for states to operate according to principles of consent and make it impossible for our enemies to impose or induce states of terror Terror and Consent argues that like so many states and civilizations in the past that suffered defeat we are fighting the last war with weapons and concepts that were useful to us then but have now been superseded Philip Bobbitt argues that we need to reforge links that previous societies have made between law and strategy to realize how the evolution of modern states has now produced a globally networked terrorism that will change as fast as we can identify it to combine humanitarian interests with strategies of intervention and above all to rethink what victory in such a war if it is a war might look like no occupied capitals no treaties no victory parades but the preservation protection and defence of states of consent This is one of the most challenging and wide ranging books of any kind about our modern world

Of Risks and Normative Responses Christina Anikó Simmig, 2023-09-23 Disaster losses in the context of natural hazards continue to rise despite a growing understanding of disaster risks and measures to reduce them One obstacle to enhancing private and public disaster risk reduction is the influence of the distorted risk perception of laypeople The book argues for the necessity of public regulations and explores means to mitigate the consequences of such distorted risk perception through legal measures and adjustments to political decision making in Council of Europe member states while respecting the value of autonomy and democratic principles In terms of collective decision making the book advocates for the implementation of deliberative fora in the democratic decision making process to mitigate the influence of distorted risk perception associated with natural hazards Additionally the book discusses a range of disaster risk reducing measures that member states may lawfully implement to protect individuals and communities from the consequences of distorted risk perceptions related to common natural hazards To underscore the merits of strengthening disaster risk reduction from the bottom up this book demonstrates how fundamental rights and democratic values impede attempts to increase DRR from the top down even in cases where people s risk perceptions are distorted In doing so the book addresses the issue of disaster risk reduction in a novel way by exposing how legal and political barriers to disaster loss reduction can be overcome by giving higher priority to mitigating distorted risk perceptions

The EU and Nanotechnologies Tanja Ehnert, 2017-08-10 This book investigates the role of law in confronting major societal transformations embodied by the emergence of nanotechnologies Taking the case of the European Union it explores who the key decision makers in the regulation of nanotechnologies are and how they take decisions The questions are explored through two distinct case studies the food and chemicals sectors The book charts an incremental retreat of the European Union to its executive powers including soft law measures such as agencies guidelines or implementing measures This the author argues results in the Union s fundamental democratic control mechanisms the EU legislature and the Court of Justice of the EU being circumvented The book recommends several immediate proposals to reform EU risk regulation

advocating a greater reliance on the European Parliament and outlining measures to increase the transparency of guidance drafting by EU agencies This important work provides a timely examination of how emerging technologies pose both regulatory and democratic challenges **Care, Uncertainty and Intergenerational Ethics** C. Groves,2014-12-02 Our

capacity to reshape the future has never been more powerful Yet our ability to foresee the consequences of what we do has not kept pace Is the idea that we have responsibilities to future generations therefore meaningful This book argues that it is with the aid of a unique reading of the care ethics tradition *Global Environmental Politics* Jean-Frédéric Morin,Amandine Orsini,Sikina Jinnah,2020 *Global Environmental Politics* provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field Going beyond the issue of climate change the textbook also introduces students to the pressing issues of desertification trade in hazardous waste biodiversity protection whaling acid rain ozone depletion water consumption and over fishing Importantly the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender trade development health agriculture and security The Politics of the Human Anne Phillips,2015-03-19 The human is a central reference point for human rights But

who or what is that human And given its long history of exclusiveness when so many of those now recognised as human were denied the name how much confidence can we attach to the term This book works towards a sense of the human that does without substantive accounts of humanity while also avoiding their opposite the contentless versions that deny important differences such as race gender and sexuality Drawing inspiration from Hannah Arendt s anti foundationalism Phillips rejects the idea of humanness as grounded in essential characteristics we can be shown to share She stresses instead the human as claim and commitment as enactment and politics of equality In doing so she engages with a range of contemporary debates on human dignity humanism and post humanism and argues that none of these is necessary to a strong politics of the human

Participation for Sustainability in Trade Sophie Thoyer,Benoît Martimort-Asso,2017-11-30 Presenting extensive new research this ground breaking study addresses the critical dimensions of participatory and democratic processes in the field of trade sustainability relationships and sustainability assessments of trade rules The specific issues in trade include social and environmental concerns for which there is a wide disparity of preferences and no economic benchmark The contributors provide analytical responses to questions of how deliberative processes can adequately close the democratic gap in global governance and how institutional reforms can ensure better access to information transparency deliberation and more accountability The book provides the necessary theoretical background as well as case studies to understand these issues and is suitable for students and academics in international law international relations and economics The Subjective Value of Privacy Lukas Antoine,2024-10-24 This book critically examines the subjective value of privacy in the context of state surveillance exploring how individuals assess costs and benefits of surveillance It delves into the complex relationship between attitudes towards privacy security and state surveillance and challenges the conventional privacy versus security

trade off through three empirical studies The first study finds that security justifications for surveillance indeed influence public support for surveillance particularly in liberal democracies The second study reveals how financial costs and personal convenience influence support for surveillance The third study suggests that privacy attitudes may be a stable personality trait influencing decisions across various contexts By employing cross comparative analysis and experimental designs this book enhances our understanding of privacy s subjective value refines theoretical frameworks and offers insights into individual decision making about privacy By highlighting the dynamic nature of privacy preferences this work reveals limitations of simplistic theoretical models and sets the stage for future research in the privacy security nexus **New**

Engagement Strategies for Energy Justice Alicia Phillips,Laura Kaschny,2025-01-08 This book offers an innovative exploration of energy justice from concept to action highlighting its role as a crucial tool for navigating the complexities of a just and sustainable energy transition The book is timely and as the global energy transition rapidly progresses it will serve as an essential resource offering practical guidance to advancing a just and sustainable energy future The perspectives presented in this book are presented by early career energy justice scholars from around the world each highlighting and proposing ways to navigate the transition The discussion focuses on three key themes the integration and repurposing of energy infrastructures with the use of technology the need for affordable and accessible energy services and the promotion of responsible governance through effective policymaking and corporate social responsibility At the heart of this book is the presentation of the Toolkit to Achieve the Just Transition using the Energy Justice Framework **Intellectual History and**

the Problem of Conceptual Change Elías J. Palti,2024-05-09 This study reassesses the main concepts of Intellectual History offering a new framework for understanding past systems of knowledge Demopolis Josiah Ober,2017-07-20 What

did democracy mean before liberalism What are the consequences for our lives today These questions are examined by this book *Food, risk and politics* Ed Randall,2013-07-19 This is a book about the risk politics of food safety Food related risks regularly grab the headlines in ways that threaten reasoned debate and obstruct sensible policy making In this book Ed Randall explains why this is the case He goes on to make the case for a properly informed and fully open public debate about food safety issues He argues that this is the true antidote to the politics of scare scandal and crisis The book skilfully weaves together the many different threads of food safety and risk politics and offers a particularly rewarding read for academics and students in the fields of politics and media studies It will also appeal to scholars from other disciplines particularly social psychology and the food sciences The book is a lively and exceptionally readable account of food safety and risk politics that will engage policy makers and the general reader It promises to help us all manage food safety issues more intelligently and successfully **Gli strumenti della precauzione** Giovanni Comandé,2006 Current Publications in Legal and Related

Fields ,2006 **Counter-Democracy** Pierre Rosanvallon,Arthur Goldhammer,2008-11-20 Democracy is established as a generally uncontested ideal while regimes inspired by this form of government fall under constant criticism Hence the steady

erosion of confidence in representatives that has become one of the major political issues of our time Amidst these challenges the paradox remains that while citizens are less likely to make the trip to the ballot box the world is far from entering a phase of general political apathy Demonstrations and activism abound in the streets in cities across the globe and on the internet Pierre Rosanvallon analyses the mechanisms used to register a citizen s expression of confidence or distrust and then focuses on the role that distrust plays in democracy from both a historical and theoretical perspective This radical shift in perspective uncovers a series of practices surveillance prevention and judgement through which society corrects and exerts pressure

Direito de Manifestação e Poder de Polícia Bruno Morisson, 2023-07-21 O presente livro analisa a interseção entre o poder de polícia e o direito de manifestação propondo parâmetros regulatórios para a garantia e maximização do exercício do referido direito fundamental preferencial São apresentadas as mazelas da atividade ordenadora estatal além das suas premissas teóricas sugerindo uma revisão democrática constitucional das suas bases de modo a reorientar a realização prioritária dos direitos fundamentais em jogo invertendo-se assim a sua tradicional noção e ainda a sua anacrônica e incompleta utilização Demonstra-se num segundo instante a profunda identidade entre o direito de manifestação e a liberdade de expressão marcando-se de todo modo suas sutis diferenças no sentido de forjar uma mínima autonomia da manifestação denominada nesse contexto como a expressão em movimento São arroladas por fim as evidentes tensões verificadas em razão do exercício do direito de manifestação e a necessidade de ponderação de interesses para o equacionamento dos conflitos com outros bens ou valores juridicamente relevantes surge a polícia das manifestações e sua correlata pretensão orientada pelos standards ordenatórios alinhados luz da Constituição da República de 1988 da centralidade dos direitos fundamentais que promove e enuncia e de seu inequívoco caráter emancipatório Journal of Economic Literature ,2005-12
