Oliver,2019-01-15 First published in 1997 this volume responds to the Conservative intention of conducting economic policy along monetarist lines after winning the General Election in May 1979 Michael J Oliver argues that the monetarist strategy was rejected for several reasons during the 1980s including the recession of the early 1980s the change in attitude to the role of the exchange rate and disagreements between politicians and policy makers It is shown that the disputes between Chancellor Nigel Lawson Lady Thatcher and her economic adviser Sir Alan Walters are central to explaining why macroeconomic policy making evolved considerably from the mid 1980s This book is the first attempt by an economic historian to apply a social learning model to the post 1979 period By adopting an inter disciplinary approach Oliver has made both an accessible addition to the debate on the conduct of economic policy since 1979 and a major contribution to the growing interest in social learning amongst social scientists Implementing PowerHA for IBM i Hernando Bedoya,Monti Abrahams,Jose Goncalves,Jana Jamsek,Sabine Jordan,Kent Kingsley,Vivian Kirkpatrick,Dave Martin,Chris Place,Roberta Placido,Larry Youngren,Jim Denton,Kolby Hoelzle,Paul Swenson,Fred Robinson,IBM Redbooks,2010-02-18 IBM PowerHATM for i formerly known as HASM is the IBM high availability disk based clustering solution for the IBM i 6 1 operating system PowerHA for i when combined with IBM i clustering technology delivers a complete high availability and disaster recovery solution for your business applications running in the IBM System i environment PowerHA for i enables you to support high availability capabilities with either native disk storage or IBM DS8000TM or DS6000TM storage servers This IBM Redbooks publication gives a broad understanding of PowerHA for i This book is divided in four major parts Part 1 Introduction and Background on page 1 provides a general introduction to clustering technology and some background Part 2 PowerHA for i setup and user interfaces on page 69 describes and explains the different interfaces that PowerHA for i has It also describes the migration process to this product and some sizing guidelines Part 3 Implementation examples using PowerHA for i on page 319 explains how to use PowerHA for i with three major ERP solutions such as SAP Lawson M3 and Oracle JD Edwards Part 4 Other IBM i 6 1 high availability enhancements on page 349 explains additional IBM i 6 1 announced enhancements in high availability Microfilm Index United States. Oatley,2010-05-25 A single currency and the necessary prior condition of exchange rate cooperation and the stabilization of exchange rates has been an elusive goal of many European leaders for more than twenty years While much of the literature on exchange rate cooperation within the European Union focuses on the integration of national economies as the driving force Thomas Oatley draws on public choice models to develop an explanation of exchange rate cooperation based on domestic politics The author then tests hypotheses derived from this model in a detailed consideration of the various efforts to stabilize currencies since the 1970s Oatley argues that monetary policy has distributional effects and is used by policy makers to achieve domestic policy goals Thus domestic politics plays an important role in defining the approach leaders take to monetary integration Oatley suggests that leaders supported the creation of the European Monetary System because governments saw a link to the Bundesbank as a useful instrument to help slow the growth of wages redistribute income from labor to capital and achieve domestic stabilization The later collapse of the System reflected the unwillingness on the part of many leaders to continue to follow the Bundesbank's lead as well as the Bundesbank's own reservations about monetary integration Given the rising strife in countries such as France over the domestic costs of monetary integration Oatley's domestic politics explanation will be useful in understanding the continued efforts of European policy makers to work towards an integrated currency This book should appeal to political scientists and economists interested in international cooperation the European Union and exchange rate systems Thomas Oatley is Assistant Professor of Political Science

web level 3 59 two plane mirrors are connected at their sides so that they form a 45 deg angle between them a light ray strikes one mirror at an angle of 30 deg to the normal and then reflects off the second mirror calculate the angle of reflection of the light ray off the second mirror reflection from the first mirror is $r_1 = 30^\circ$

reflection of light types of mirrors plain mirror and spherical mirror - Jul 25 2022

web 2 days ago reflection is one of the distinctive properties of light it is the reflection of light which enables us to see anything light reflection occurs when a ray of light meets a smooth polished surface and reflects back the incident light ray is said to be reflected off the surface when it lands on it the beam that rebounds is known as the
