Renewing Our Rivers Mark K. Briggs, Waite R. Osterkamp, 2021-01-05 Our rivers are in crisis and the need for river restoration has never been more urgent. Water security and biodiversity indices for all of the world's major rivers have declined due to pollution, diversions, impoundments, fragmented flows, introduced and invasive species, and many other abuses. Developing successful restoration responses are essential. *Renewing Our Rivers* addresses this need head-on with examples of how to design and implement stream corridor restoration projects. Based on the experiences of seasoned professionals, *Renewing Our Rivers* provides stream restoration practitioners the main steps to develop successful and viable stream restoration projects that last. Ecologists, geomorphologists, and hydrologists from dryland regions of Australia, Mexico, and the United States share case studies and key lessons learned for successful restoration and renewal of our most vital resource. The aim of this guidebook is to offer essential restoration guidance that allows a start-to-finish overview of what it takes to bring back a damaged stream corridor. Chapters cover planning such emerging themes as climate change and environmental flow, the nuances of implementing restoration tactics, and monitoring restoration results. *Renewing Our Rivers* provides community members, educators, students, natural resource practitioners, experts, and scientists broader perspectives on how to move the science of restoration to practical success. *Life-Cycle of Structures Under Uncertainty* Dan M.

Frangopol, Sunyong Kim, 2019-07-25 Life cycle analysis is a systematic tool for efficient and effective service life management of deteriorating structures. In the last few decades, theoretical and practical approaches for life cycle performance and cost analysis have been developed extensively due to increased demand on structural safety and service life extension. This book presents the state of the art in life cycle analysis and maintenance optimization for fatigue sensitive structures. Both theoretical background and practical applications have been provided for academics, engineers, and researchers. Concepts and approaches of life cycle performance and cost analysis developed in recent decades are presented. The major topics covered include: a) probabilistic concepts of life cycle performance and cost analysis; b) inspection, monitoring, and maintenance for fatigue cracks; c) estimation of fatigue crack detection; d) optimum inspection and monitoring planning; e) multi-objective life cycle optimization; and f) decision making in life cycle analysis. Life cycle optimization covered in the book considers probability of fatigue crack detection, fatigue crack damage, detection time, maintenance times, probability of failure, service life, and total life cycle cost. For the practical application and integration of recently developed approaches for inspection and maintenance planning, efficient and effective multi-objective optimization and decision making are presented. This book will help engineers engaged in civil and marine structures, including students, researchers, and practitioners, with reliable and cost-effective maintenance planning of fatigue sensitive structures and to develop more advanced approaches and techniques in the field of life cycle maintenance optimization and safety of structures under various aging and deteriorating conditions. **Key Features:** Provides the state of the art in life cycle cost analysis and optimization for fatigue sensitive structures. Provides a

solid foundation of theoretical backgrounds and practical applications both for academics and practicing engineers and researchers Covers illustrative examples and recent development for optimum service life management Deals with various structures such as bridges and ships subjected to fatigue      **Monthly Catalogue, United States Public Documents** ,1990

Richardson,Piero Genovesi,2013-11-27 This book is the first comprehensive global review of all aspects of alien plant invasions in protected areas It provides insights into advances in invasion ecology emanating from work in protected areas and the link to locally relevant management support for protected areas The book provides in depth case studies illuminating interesting and insightful knowledge that can be shared across the global protected area network The book includes the collective understanding of 80 ecologists and managers to extract as much information as possible that will support the long term management of protected areas and the biodiversity and associated ecosystem services they maintain This outstanding volume draws together pretty much all that can be said on this topic ranging from the science through policy to practical action Dr Simon N Stuart IUCN Species Survival Commission UK This important and timely volume addresses two of the most serious problems affecting biodiversity conservation today assessing the extent to which protected areas are impacted by biological invasions and the complex problems of managing these impacts Written by leading specialists it provides a comprehensive overview of the issues and gives detailed examples drawn from protected areas across the world Professor Vernon H Heywood School of Biological Sciences University of Reading UK      *Disability in Higher Education* Nancy J. Evans,Ellen M. Broido,Kirsten R. Brown,Autumn K. Wilke,2017-02-15 Create campuses inclusive and supportive of disabled students staff and faculty Disability in Higher Education A Social Justice Approach examines how disability is conceptualized in higher education and ways in which students faculty and staff with disabilities are viewed and served on college campuses Drawing on multiple theoretical frameworks research and experience creating inclusive campuses this text offers a new framework for understanding disability using a social justice lens Many institutions focus solely on legal access and accommodation enabling a system of exclusion and oppression However using principles of universal design social justice and other inclusive practices campus environments can be transformed into more inclusive and equitable settings for all constituents The authors consider the experiences of students faculty and staff with disabilities and offer strategies for addressing ableism within a variety of settings including classrooms residence halls admissions and orientation student organizations career development and counseling They also expand traditional student affairs understandings of disability issues by including chapters on technology law theory and disability services Using social justice principles the discussion spans the entire college experience of individuals with disabilities and avoids any single issue focus such as physical accessibility or classroom accommodations The book will help readers Consider issues in addition to access and accommodation Use principles of universal design to benefit students and employees in

academic cocurricular and employment settings Understand how disability interacts with multiple aspects of identity and experience Despite their best intentions college personnel frequently approach disability from the singular perspective of access to the exclusion of other important issues This book provides strategies for addressing ableism in the assumptions policies and practices organizational structures attitudes and physical structures of higher education *Human-Animal Interaction (HAI) Research: A Decade of Progress* Peggy D.
