Ethnopolitics in Cyberspace Robert A. Saunders, 2011-01-01 Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village the new millennium has instead seen a proliferation of nationalism on the Web Cyberspace a vast digital terrain built upon interwoven congeries of data and sustained through countless public private communication networks has even begun to alter the very fabric of national identity This is particularly true among stateless nations diasporic groups and national minorities which have fashioned the Internet into a shield against the assimilating efforts of their countries of residence As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information the Internet has endowed a new generation of technology savvy elites with a level of influence that would have been impossible to obtain a decade ago Challenged nations from Assyrians to Zapotecs have used the Web to rewrite history engage in political activism and reinvigorate moribund languages This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups Albanians outside of Albania Russians in the near abroad Roma Gypsies and European Muslims Accompanying these case studies are briefer discussions of dozens of other online national movements as well as the ramifications of Internet nationalism for offline domestic and global politics The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities Bringing together research and methodologies from a range of fields Saunders fills a gap in the social science literature on the Internet's central role in influencing nationalism in the twenty first century By creating new spaces for political discourse alternative avenues for cultural production and novel means of social organization the Web is remaking what it means to be part of nation This insightful study provides a glimpse of this exciting and sometimes disturbing new landscape

allowing him to critique his own British culture At the same time he brings an outsider perspective to evaluate certain aspects of how the Roma are living out their Pentecostalism in his particular UK context Within these two intersecting currents he is able to envision a thoroughly Gospel centered yet contextual picture of One New Humanity in Christ pointing to something beyond Roma rights policies and Gadje Roma relations In fact this is a book for all Christians who want to reflect on their own cultural blind spots in light of the Biblical narrative Melody J Wachsmuth mission researcher and writer
