Preparing Adult English Learners to Read for College and the Workplace Kirsten Schaetzel,Joy Kreeft Peyton,Rebeca Fernández,2024-07 How to prepare adult English learners for reading success **Driver Training for Automated Vehicles** Siobhán E. Merriman,Katherine L. Plant,Kirsten M. A. Revell,Neville A. Stanton,2024-04-30 Since the introduction of Automated Vehicles AVs on roads there have been a number of high profile collisions which have highlighted significant driver challenges These include challenges associated with drivers trust in the automation their knowledge and awareness of the AV s capabilities and limitations and their reduced situation awareness of the road environment and the vehicle Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised Driver Training for Automated Vehicles A Systems Approach identifies the training requirements for drivers of AVs and takes a systematic approach to design develop implement and evaluate a comprehensive training package to address these requirements This book explores how training can overcome the driver challenges associated with AVs by improving drivers mental models trust in automation decisions and behaviour when activating a Level 4 AV It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs identifying the challenges and training requirements for drivers of AVs and then developing and evaluating a training programme to achieve these requirements

This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need. It walks readers through a systematic four step process and provides practical guidance to develop and evaluate an effective training programme. The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research. This book is an ideal read for practitioners, designers and academics with a professional or research interest in AVs. Its appeal extends to those in the fields of automotive design, Systems Engineering, Human Factors and education and training.

Business game-based learning in management education Nicola Baldissin, Simonetta Bettiol, Simone Magrin, Fabio Nonino, 2013-02-13 Business Games are a specific typology of serious games which combine business simulations and games to support management and entrepreneurial training. This volume presents the theory and teaching methodology of business games. Active learning is the foundation of business game based learning which places learners at the centre of the educational process. The interactive nature of games stimulates learning and learning by doing through simulations prepares students to face and understand the ambiguities and uncertainties of the real working environment. With its balance of theoretical and practical content, this book aims to meet the needs of lecturers and other education professionals interested in the use and development of business games. High school teachers and other education providers can learn how to correctly design a management course enriched by the use of a business game. The book also deals with the design and development of models that can be used in the creation of new software.
