 4. **Conclusion**

- First the authors (19) use a two-stage model: **Stage 1** shows that the 1990s saw a decline in the number of people who were employed in the public sector, and a corresponding increase in the private sector. **Stage 2** shows that the increase in the private sector was not due to a decline in the public sector, but rather to a decline in the public sector's share of the economy.
