Louis Sullivan Prophet Of Modern Architecture Revised Edition:

Louis Sullivan, Prophet of Modern Architecture Hugh Morrison, 1998 This reissue provides Morrison's classic text completely redesigned and reset in a larger more modern format It also offers an assessment of Hugh Morrison's groundbreaking research in Timothy J Samuelson's Introduction and most important an authoritative revision of the chronological List of Buildings including corrections of the data in light of six decades of research **LOUIS SULLIVAN AND HIS MENTOR, JOHN HERMAN EDELMANN, ARCHITECT** Charles E. Gregersen Aia Ncarb, 2013 Although the world famous architect Louis Sullivan praised John Edelmann at length as a friend philosopher gifted draftsman and above all as his benefactor in his The Autobiography of an Idea he avoided any mention of having worked for two years as an apprentice in Edelmann's architectural office and the influence that experience obviously had on his future work This book corrects that deficiency in Sullivan's narrative Through a comparison of their buildings and ornamental designs the differences in the approaches of these two men to architectural planning and the debt Sullivan owed to Edelmann's unique ornamental style in the development of his own world renowned ornament is demonstrated Edelmann is also revealed as the young architect who not only took Sullivan on as an apprentice but in time introduced him to his future partner Dankmar Adler only to be betrayed in the end by Sullivan for having done so **Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture** Lauren S. Weingarden, 2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H Sullivan 1856 1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism In this study Lauren Weingarden reveals Sullivan's eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan's artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan's writings and designs Weingarden shows how he translated both Ruskin's tenets of Gothic naturalism and Whitman's poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan's oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry **Sullivan's City** Zanten David Van, 2000-07-04 Finally the brilliant pencil execution of ornament in his old age became a surrogate for the great architectural projects realized earlier David Van Zanten's essay on how Sullivan's ornament shaped the city is illuminated by archival views and new color photographs by architectural photographer Cervin Robinson **BOOK JACKET Contemporary**

The Architecture of Use Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life **Architectural Theory of Modernism** Ute

Michael Macrone, 1999 *The Soundscape of Modernity* Emily Thompson, 2004-09-17 A vibrant history of acoustical technology and aural culture in early twentieth century America In this history of aural culture in early twentieth century America Emily Thompson charts dramatic transformations in what people heard and how they listened What they heard was a new kind of sound that was the product of modern technology They listened as newly critical consumers of aural commodities By examining the technologies that produced this sound as well as the culture that enthusiastically consumed it Thompson recovers a lost dimension of the Machine Age and deepens our understanding of the experience of change that characterized the era Reverberation equations sound meters microphones and acoustical tiles were deployed in places as varied as Boston's Symphony Hall New York's office skyscrapers and the soundstages of Hollywood The control provided by these technologies however was applied in ways that denied the

particularity of place and the diverse spaces of modern America began to sound alike as a universal new sound predominated. Although this sound clear, direct, efficient and nonreverberant had little to say about the physical spaces in which it was produced, it speaks volumes about the culture that created it. By listening to it, Thompson constructs a compelling new account of the experience of modernity in America.

Master Builders National Trust for Historic Preservation, 1985-10-01

The Architect Builds Visible History Vincent Scully Which architect designed the pedestal for the Statue of Liberty Who put a Chippendale pediment atop a skyscraper and quickly created a landmark of contemporary architecture Who was the only American architect to receive the Congressional Medal of Honor for bravery during the Civil War Which architect designed a castle in California for William Randolph Hearst Master Builders answers these and scores of other questions about more than 100 architects and builders who have left indelible marks on American architecture. This unique guide puts faces with America's most well known and loved buildings from the U.S. Capitol and Washington Monument through the first skyscrapers and landmarks of the Post Modern movement. Why should you want to know more about these architects asks Roger K. Lewis in his introduction. The reason is simple. You are undeniably connected to the built environment that you inhabit, use, see and respond to. You affect building design and building design affects you. Can you pair these master builders with their works: Frank Lloyd Wright, U.S. Capitol, Skidmore, Owings and Merrill, Central Park, Adler and Sullivan, University of Virginia, Ludwig Mies van der Rohe, Glass House, William Thornton, Home Insurance Building, Orson Squire Fowler, Fallingwater, H.H. Richardson, CBS Building, Frederick Law Olmsted, San Simeon, James Renwick, Seagram Building, Robert Mills, Trinity Church, Boston, I.M. Pei, Salk Institute, Julia Morgan, Sears Tower, Eero Saarinen, Smithsonian Castle, Cass Gilbert, John E. Kennedy Library, McKim, Mead and White, U.S. Supreme Court, Louis I. Kahn, Chicago Stock Exchange, Thomas Jefferson, Octagonal Houses, Philip Johnson, Pennsylvania Station, William Le Baron Jenney, Washington Monument.
