technology The fifth edition of International Conference on 3D Imaging Technology 3DDIT MSP DL continues the good
traditions already established by the first four editions of the conference to provide a wide scientific forum for researchers
academia and practitioners to exchange newest ideas and recent achievements in all aspects of image processing and
analysis together with their contemporary applications The conference proceedings are published in two volumes The main
topics of the papers comprise famous trends such as 3D image representation 3D image technology 3D images and graphics
and computing and 3D information technology In these proceedings special attention is paid at the 3D tensor image
representation the 3D content generation technologies big data analysis and also deep learning artificial intelligence the 3D
image analysis and video understanding the 3D virtual and augmented reality and many related areas The first volume
contains papers in 3D image processing transforms and technologies The second volume is about computing and information
technologies computer images and graphics and related applications The two volumes of the book cover a wide area of the
aspects of the contemporary multidimensional imaging and the related future trends from data acquisition to real world
