Nursing Case Study

I. Health History

The subject of my case study is W. R. WR, is a 75 year old white male who was admitted to Miami Care Hospital on November 23, 2002. Prior to being admitted to the hospital, W. R. had been in excellent health. His condition apparently began three weeks prior to being admitted. On November 23, W. R.'s son found him lying on the floor unresponsive and unable to arise.

Mr. R. was diagnosed as having an acute cerebral vascular accident. This disorder can also be described as a "stroke." It occurs when there is an interruption of normal blood flow to one or more of the blood vessels that supply the brain. Thrombosis, embolism, and hemorrhage are the primary causes of a CVA. (Jennerson and Johnson 2002) The tissues of the brain become ischemic, leading to hypoxia or anoxia with destruction or necrosis of the neurons, glia, and vasculature. Complications of CVA include unstable blood pressure, urinary and bowel impotence, infection, pneumonia, contractures, and pulmonary emboli. CVA is the third leading cause of death in the United States and affects more than 100,000 Americans annually. (Jennerson and Johnson 2002)

He was widowed in December of 2001, one daughter has coronary artery disease, one son died of an MI at age 37, and one son died with lung cancer at 37. He had been the primary care giver of his daughter until she was admitted to the hospital three weeks ago. She is dying with a short bowel syndrome and colitis and is now being taken care of in hospice. Since after being told about Mr. R.'s appetite decreased and he had become congested. He was placed on Folic to treat symptoms of depression. He had also been taking Cipra for congestive. Also his family noticed that he was suffering from confusion. As a result, they brought him into the Emergency Room for evaluation. The Emergency Room doctor

Maternity Case Studies For Nursing Students:

Case Studies in Maternity and Pediatric Nursing Diann S. Gregory, Bonita E. Broyles, 2009 Created especially for nurses the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real life client situations Every case contains a blueprint of variables that must be considered while evaluating a particular scenario and are pertinent concerning the client nursing protocol and setting of care Examples of these variables include age gender cultural influences pre existing conditions legal issues or communication skills Each blueprint and case is different just as each clinical situation is unique By simulating the decision making process learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners Simply stated Clinical Decision Making shortens the distance between theory and practice like no other educational tool Maternity Nursing Case Studies

, 1984 **Clinical Decision Making** Diann S. Gregory, 2006 Created especially for nurses the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application Case Studies in Maternity Women's Health is the first installment in this innovative series which provides over forty maternity and women's health case histories questions and responses based on real life client situations Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario which are pertinent concerning the client nursing protocol and setting of care Examples of these variables include age gender or culture of the client the client with a pre existing condition legal issues or communication skills Each blueprint and case is different just as each clinical situation is unique to others By allowing learners to simulate the actual decision making process they can gain a comfort level to make informed clinical judgments that will help them become successful nurses Quite simply Clinical Decision Making shortens the distance between the classroom and nursing practice like no other educational tool **Maternity Nursing Case Studies** Mildred A.
