

Mathematics Lesson Plan

Lesson: Counting: Pennies, Nickels, and Dimes

Length: Approximately 30 minutes

Age or Grade Level Intended: Second grade (Mathematics)

Academic Standard(s):

- Math 2.1.1 -- Count by ones, twos, fives, and tens to 100.
- Math 2.6.2 -- Use tools such as objects or drawings to model problems.

Performance Objective(s):

- The student will correctly count by pennies (ones) to solve word problems involving money 100% of the time.
- The student will correctly count by nickels (fives) to solve word problems involving money 75% of the time.
- The student will correctly count by dimes (tens) to solve word problems involving money 75% of the time.
- The student will accurately draw representations of the word problems given to them 75% of the time.

Assessment:

Students will be given a worksheet at the end of the lesson to assess whether or not they completely grasp the concept. (Copy of worksheet and answer key have been attached.)

** Because pennies may be easier to count than nickels and dimes, the percentage of problems that the students have to complete to meet the objective has been adjusted.

Advance Preparation by Teacher:

The teacher will need to assemble all the materials in advance—

- Copies of the assessment worksheet (one per student)
- Coin manipulatives (paper/plastic or actual, depending on availability)
