Building Isomorphisms is based on the accomplishments of a cohort group of learners from first grade through high school
and beyond concentrating on their work on a set of combinatorics tasks By studying these students the editors gain insight
into the foundations of proof building the tools and environments necessary to make connections activities to extend and
generalize combinatoric learning and even explore implications of this learning on the undergraduate level This volume
underscores the power of attending to basic ideas in building arguments it shows the importance of providing opportunities
for the co construction of knowledge by groups of learners and it demonstrates the value of careful construction of
appropriate tasks Moreover it documents how reasoning that takes the form of proof evolves with young children and
discusses the conditions for supporting student reasoning **Math Explorations and Applications** Stephen S.
