priority Numerous programs are operating around the country to address the issue of underperformance in light of the shortcomings of our public school system In *Forever Free* Tracy Swinton Bailey charts the journey of one such program her nonprofit Freedom Readers From a childhood shaped by books to a career promoting the love of reading she describes the hurdles and rewards of academia teaching mobilizing and fundraising Bailey outlines clearly and persuasively how Freedom Readers one to one tutoring model has worked in the rural South and how it can work across the US This book will inspire and empower readers and should be placed in the hands of educators and organizers at every level *Improving Working Memory in Learning and Intellectual Disabilities* Silvia Lanfranchi, Barbara Carretti, 2016-08-05 The last forty years of research have demonstrated that working memory WM is a key concept for understanding higher order cognition To give an example WM is involved in reading comprehension problem solving and reasoning but also in a number of everyday life activities It has a clear role in the case of atypical development too For instance numerous studies have shown an impairment in WM in individuals with learning disabilities LD or intellectual disabilities ID and several researchers have hypothesized that this can be linked to their difficulties in learning cognition and everyday life The latest challenge in the field concerns the trainability of WM If it is a construct central to our understanding of cognition in typical and atypical development then specific intervention to sustain WM performance might also promote changes in cognitive processes associated with WM The idea that WM can be modified is debated however partly because of the theoretical implications of this view and partly due to the generally contradictory results obtained so far In fact most studies converge in demonstrating specific effects of WM training i e improvements in the trained tasks but few transfer effects to allied cognitive processes are generally reported It is worth noting that any maintenance effects when investigated are even more meagre In addition a number of methodological concerns have been raised in relation to the use of 1 single tasks to assess the effects of a training program 2 WM tasks differing from those used in the training to assess the effects of WM training and 3 passive control groups These and other crucial issues have so far prevented any conclusions from being drawn on the efficacy of WM training Bearing in mind that the opportunity to train WM could have a huge impact in the educational and clinical settings it seems fundamentally important to shed more light on the limits and potential of this line of research The aim of the research discussed here is to generate new evidence on the feasibility of training WM in individuals with LD and ID There are several questions that could be raised in this field For a start can WM be trained in this population Are there some aspects of WM that can be trained more easily than others Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes *Promoting Your School* Carolyn Warner, 2009-01-27 Clearly indicates how to communicate with a variety of groups to obtain public support This book is very easy to read and understand and has a wealth of examples Anne Roede Giddings Assistant Superintendent Ansonia Public Schools CT The examples spur thought on how schools can best communicate with their communities The book is truly

Model-Free Prediction and Regression Dimitris N. Politis, 2015-11-13 The Model Free Prediction Principle expounded upon in this monograph is based on the simple notion of transforming a complex dataset to one that is easier to work with e g i i d or Gaussian As such it restores the emphasis on observable quantities i e current and future data as opposed to unobservable model parameters and estimates thereof and yields optimal predictors in diverse settings such as regression and time series Furthermore the Model Free Bootstrap takes us beyond point prediction

in order to construct frequentist prediction intervals without resort to unrealistic assumptions such as normality Prediction has been traditionally approached via a model based paradigm i.e. a) fit a model to the data at hand and b) use the fitted model to extrapolate/predict future data Due to both mathematical and computational constraints 20th century statistical practice focused mostly on parametric models Fortunately with the advent of widely accessible powerful computing in the late 1970s computer intensive methods such as the bootstrap and cross validation freed practitioners from the limitations of parametric models and paved the way towards the big data era of the 21st century Nonetheless there is a further step one may take i.e. going beyond even nonparametric models this is where the Model Free Prediction Principle is useful Interestingly being able to predict a response variable Y associated with a regressor variable X taking on any possible value seems to inadvertently also achieve the main goal of modeling i.e. trying to describe how Y depends on X Hence as prediction can be treated as a by-product of model fitting key estimation problems can be addressed as a by-product of being able to perform prediction In other words a practitioner can use Model Free Prediction ideas in order to additionally obtain point estimates and confidence intervals for relevant parameters leading to an alternative transformation based approach to statistical inference

Notices of the American Mathematical Society American Mathematical Society, 1994 *The SAGE Handbook of Qualitative Research in the Asian Context* Safary Wa-Mbaleka, Arceli Rosario, 2022-05-05 Qualitative research is growing in Asia and globally In an Asian context this requires an awareness of a completely different set of norms practices and expectations than those covered by books from a western perspective This handbook truly celebrates these differences Spanning the full research process from philosophy and ethics to design and methods and through data collection management analysis and dissemination it focuses specifically on the practicalities needed to conduct effective and culturally responsive research in the Asian context This handbook extends beyond researchers actually in Asia and also speaks to researchers working with Asian participants researching in Asian immigrant neighbourhoods and studying the larger global topics like socioeconomic challenges climate change or technological advancement This is the first book to focus specifically on qualitative research in the Asian context and includes diverse contributors from Asia such as the Philippines Singapore Thailand India Oman China South Korea Indonesia Kazakhstan Hong Kong and from other continents such as North America South America Africa Europe and Oceania Section 1 Foundations of Qualitative Research in Asia Section 2 Qualitative Research Designs Section 3 Best Practices in Dealing with Qualitative Research Data Section 4 Other Qualitative Research Topics
