Golden Silk Smoke A History Of Tobacco In China 1550 201:

Golden-Silk Smoke Carol Benedict,2011-04-10 Tobacco has been pervasive in China almost since its introduction from the Americas in the mid sixteenth century One third of the world s smokers over 350 million now live in China and they account for 25 percent of worldwide smoking related deaths This book examines the deep roots of China s contemporary cigarette culture and smoking epidemic and provides one of the first comprehensive histories of Chinese consumption in global and comparative perspective Provided by publisher

The Republic of China Xavier Paules,2023-11-08 The declaration of the Republic of China in 1912 signalled an entirely new era Not only did the revolution of 1911 12 bring about the fall of the Qing dynasty it also brought an end to the entire series of dynasties that had marked Chinese history for over two millennia Radical reforms since 1901 had culminated in the ending of the political status quo and the rejection of the very idea of empire Drawing on the most recent historical research Xavier Paul s provides a comprehensive account of the crucial but chaotic period that stretched from the founding of the Republic of China in 1912 to the civil war of 1945 9 which ended with the victory of the Chinese Communist Party CCP and the establishment of the People s Republic of China Paul s challenges various common claims about this period It is often assumed that the CCP was instrumental in bringing about key events by skilfully mobilizing the population to serve its ends Paul s argues by contrast that the CCP took advantage of fortunate circumstances and that even then it was only in a position to challenge the supremacy of the Guomindang as late as 1944 His analysis takes a broad view by considering the importance of political actors both within and external to the revolutionary movement enabling him to offer a balanced interpretation of the republican period which sheds new light on China s political cultural and economic development

Chinese Cigarette Manufacturing in Critical Historical Perspectives Matthew Kohrman,Gan Quan,Liu Wennan,Robert N. Proctor,2018-04-24 Please note that this is a Chinese language edition A favorite icon for cigarette manufacturers across China since the mid twentieth century has been the panda with factories from Shanghai to Sichuan using cuddly cliché to market tobacco products The proliferation of panda branded cigarettes coincides with profound yet poorly appreciated shifts in the worldwide tobacco trade Over the last fifty years transnational tobacco companies and their allies have fueled a tripling of the world s annual consumption of cigarettes At the forefront is the China National Tobacco Corporation now producing forty percent of cigarettes sold globally What s enabled the manufacturing of cigarettes in China to flourish since the time of Mao and to prosper even amidst public health condemnation of smoking In this book an interdisciplinary group of scholars comes together to tell that story They offer novel portraits of people within the Chinese polity government leaders scientists tax officials artists museum curators and soldiers who have experimentally revamped the country s pre Communist cigarette supply chain and fitfully expanded its political economic and cultural influence These portraits cut against the grain of what contemporary tobacco control experts typically study opening a vital new window on tobacco the single largest cause of preventable death worldwide today

Ambivalent

Pleasures Scott K. Taylor, 2024-08-15 *Ambivalent Pleasures* explores how Europeans wrestled with the novel experience of consuming substances that could alter moods and become addictive. During the early modern period, psychotropic drugs like sugar, chocolate, tobacco, tea, coffee, distilled spirits like gin and rum, and opium either arrived in western Europe for the first time or were newly available as everyday commodities. Drawing from primary sources in English, Dutch, French, Italian, and Spanish, Scott K. Taylor shows that these substances embodied Europeans' anxieties about race and empire, religious strife, shifting notions of class and gender roles, and the moral implications of urbanization and global trade. Through the writings of physicians, theologians, political pamphleteers, satirists, and others, *Ambivalent Pleasures* tracks the emerging understanding of addiction, fears about the racial, class, and gendered implications of using these soft drugs, including that consuming them would make users more foreign, and the new forms of sociability that coalesced around their use. Even as Europeans' moral concerns about the consumption of these drugs fluctuated, the physical and sensory experiences of using them remained a critical concern, anticipating present-day rhetoric and policy about addiction to drugs and alcohol.

[Nature's Pharmacopeia](#) Dan Choffnes, 2016-08-09 This beautifully illustrated, elegantly written textbook pairs the best research on the biochemical properties and physiological effects of medicinal plants with a fascinating history of their use throughout human civilization, revealing the influence of nature's pharmacopeia on art, war, conquest, and law. By chronicling the ways in which humans have cultivated plant species, extracted their active chemical ingredients, and investigated their effects on the body over time, *Nature's Pharmacopeia* also builds an unparalleled portrait of these special herbs as they transitioned from wild flora and botanical curiosities to commodities and potent drugs. The book opens with an overview of the use of medicinal plants in traditional practices and indigenous belief systems of people in the Americas, Africa, Asia, and ancient Europe. It then connects medicinal plants to the growth of scientific medicine in the West. Subsequent chapters cover the regulation of drugs, the use of powerful plant chemicals such as cocaine, nicotine, and caffeine in various medical settings, and the application of biomedicine's intellectual frameworks to the manufacture of novel drugs from ancient treatments. Geared toward nonspecialists, this text fosters a deep appreciation of the complex chemistry and cultural resonance of herbal medicine while suggesting how we may further tap the vast repositories of the world's herbal knowledge to create new pharmaceuticals.

Untamed Shrews Shu Yang, 2023-07-15 *Untamed Shrews* traces the evolution of unruly women in Chinese literature from the reviled shrew to the celebrated new woman. Notorious for her violence, jealousy, and promiscuity, the character of the shrew personified the threat of unruly femininity to the Confucian social order and served as a justification for punishing any woman exhibiting these qualities. In this book, Shu Yang connects these shrewish qualities to symbols of female empowerment in modern China. Rather than meeting her demise, the shrew persisted, and her negative qualities became the basis for many forms of the new woman, ranging from the early Republican suffragettes and Chinese *Noras* to the Communist and socialist radicals. Criticism of the shrew endured, but her vicious, sexualized, and transgressive nature became a source of pride, placing

her among the ranks of liberated female models *Untamed Shrews* shows that whether male writers and the state hate fear or love them there will always be a place for the vitality of unruly women Unlike in imperial times the shrew in modern China stayed untamed as an inspiration for the new woman *Poisonous Pandas* Matthew Kohrman, Gan Quan, Liu Wennan, Robert N. Proctor, 2018-04-24 A favorite icon for cigarette manufacturers across China since the mid twentieth century has been the panda with factories from Shanghai to Sichuan using cuddly cliché to market tobacco products The proliferation of panda branded cigarettes coincides with profound yet poorly appreciated shifts in the worldwide tobacco trade Over the last fifty years transnational tobacco companies and their allies have fueled a tripling of the world's annual consumption of cigarettes At the forefront is the China National Tobacco Corporation now producing forty percent of cigarettes sold globally What's enabled the manufacturing of cigarettes in China to flourish since the time of Mao and to prosper even amidst public health condemnation of smoking In *Poisonous Pandas* an interdisciplinary group of scholars comes together to tell that story They offer novel portraits of people within the Chinese polity government leaders scientists tax officials artists museum curators and soldiers who have experimentally revamped the country's pre Communist cigarette supply chain and fitfully expanded its political economic and cultural influence These portraits cut against the grain of what contemporary tobacco control experts typically study opening a vital new window on tobacco the single largest cause of preventable death worldwide today
