*Narratives of Qualitative Research* Josh Tenenberg, 2024-05-21 *Narratives of Qualitative Research* uses a novel form of writing about how to do qualitative research called a praxis narrative Each narrative is told from the author's perspective in carrying out one of his past research studies in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the

reader can follow the author's journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it. This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences, education and behavioural sciences. **GoPro Cameras For Dummies** John Carucci, 2014-11-10. Culture as Everyday Life Dennis Waskul, Phillip Vannini, 2015-11-19 In Popular Culture and Everyday Life Phillip Vannini and Dennis Waskul have brought together a variety of short essays that illustrate the many ways that popular culture intersects with mundane experiences of everyday life Most essays are written in a reflexive ethnographic style primarily through

observation and personal narrative to convey insights at an intimate level that will resonate with most readers. Some of the topics are so mundane they are legitimately universal: sleeping, getting dressed, going to the bathroom, etc. Others are common enough that most readers will directly identify in some way: watching television, using mobile phones, playing video games, etc. While some topics will appeal more or less depending on a reader's gender, interests, and recreational pastimes (putting on makeup, watching the Super Bowl, homemaking, etc.), this book will remind readers of their own similar experiences, provide opportunities to reflect upon them in new ways, as well as compare and contrast how experiences relayed in these pages relate to lived experiences. The essays will easily translate into rich and lively classroom discussions that shed new light on a familiar, taken-for-granted everyday life, both individually and collectively. At the beginning of the book, the authors have provided a grid that shows the topics and themes that each article touches on. This book is for popular culture classes and will also be an asset in courses on the sociology of everyday life, ethnography, and social psychology.
