Remove the camera from its housing simply by opening the backdoor. Slide the latch over on the battery door and pop in the battery before closing it. On the side you'll find a memory card compartment – open it up and push your Micro SD card into place.

**2 Rehouse** It's important that you put the housing back on your camera correctly to ensure it's kept waterproof and safe from dust and debris. So slide the camera back into its housing and close the backdoor by snapping the top latch down firmly.

**3 Let's get filming** To turn the camera on press the Mode button on the front. If you press it again you'll find the folder of modes, where you can flick between filming and photography modes. When you're ready to record, hit the shutter button and tap it again to stop.

Tenenberg,2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research called a praxis narrative Each narrative is told from the author s perspective in carrying out one of his past research studies in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can follow the author s journey through his research studies as a way to reorient their conception of qualitative research and

their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences education and behavioural sciences
