Reconstruction Neal Shasore, Jessica Kelly, 2023-02-23 Commendation the Colvin Prize

2023 Society of Architectural Historians of Great Britain *Reconstruction* explores the impact of the First World War on the built environment examining the immediate and longer term aftermath of the Great War on the architecture of Britain and the British Empire during the interwar years While much attention has been paid by historians to post war architectural reconstruction after 1945 the earlier developments of the interwar period 1919 1939 have been comparatively overlooked This volume reveals how the architectural developments of this period not only provided important foundations for what happened after 1945 they are also of real significance in their own right Sixteen essays written by leading and emerging scholars bring together new and diverse approaches to the period a period of reconstruction fraught with the challenges of modernity and democratisation The collection considers the complex effects of reconstruction on design discourse practice and professionalism and deals with the full spectrum of architectural styles and approaches privileging neither Modernism nor traditional styles like the neo Georgian It brings to the fore social and political histories of the built environment and makes important postcolonial interventions into the architectural history of British Imperialism at home and in its far reaches in Cairo South Africa Australia and India

Draining New Orleans Richard Campanella, 2023-05-03 In *Draining New Orleans* the first full length book devoted to the world's toughest drainage problem renowned geographer Richard Campanella recounts the epic challenges and ingenious efforts to dewater the Crescent City With forays into geography public health engineering architecture politics sociology race relations and disaster response he chronicles the herculean attempts to reclaim the city's swamps and marshes and install subsurface drainage for massive urban expansion The study begins with a vivid description of a festive event on Mardi Gras weekend 1915 which attracted an entourage of elite New Orleanians to the edge of Bayou Barataria to witness the christening of giant water pumps President Woodrow Wilson connected via phoneline from the White House planned to activate the station with the push of a button effectively draining the West Bank of New Orleans What transpired in the years and decades that followed can only be understood by examining the large swath of history dating back two centuries earlier to the geological formation and indigenous occupation of this delta and extending through the colonial antebellum postbellum and Progressive eras to modern times The consequences of dewatering New Orleans proved both triumphant and tragic The city's engineering prowess transformed it into a world leader in drainage technology yet the municipality also fell victim to its own success Rather than a story about mud and machinery this is a history of people power and the making of place Campanella emphasizes the role of determined and sometimes unsavory individuals who spearheaded projects to separate water from dirt creating lucrative opportunities in the process not only for the community but also for themselves
