

## Guided Article Review 2

### 1. What were the two primary research questions?

Answers:

- The first primary research question was "How likely do you think it is that the 8<sup>th</sup> amendment referendum will pass?"
- The second primary research question was "when you completed the first survey in this study, how likely did you think it was that the 8<sup>th</sup> amendment referendum would pass?"

### 2. When did participants complete the study?

Answer:

- Participants first completed the survey in May 2018
- ### 3. List three questions that measured engagement with the 8<sup>th</sup> amendment after the referendum was held?

Answer:

- How important is the outcome of the referendum to you?
  - How often in the past three months have you had discussions with family or friends concerning the 8<sup>th</sup> amendment referendum?
  - Did you formally campaign on either side of the referendum?
- ### 4. How did "yes" and "no" voters differ in terms of hindsight bias?

Answer:

- Yes and no voters differ in terms of hindsight bias because when they were asked to remember their predication later, no voters recalled a higher estimated probability which demonstrated a classic hindsight bias effect but yes voters did not.

### 5. How did emotions affect hindsight bias?

Answer:

- The emotions affected hindsight bias because the hindsight bias was affected by informal campaigning and the participants degree of surprise and emotion on hearing the results of the questions. Participants who had stronger feelings of surprise and emotionality expressed the opposite of the traditional hindsight bias.

Artificial intelligence AI and robotics have boomed in the 21st century. These emerging and disruptive technologies are immersed in our lives from apps in mobile devices to the purchases we make on the internet, streaming platforms and even court decisions and predictive policing. Together with science and certain needs, relevant implementations of AI and robotics arise related to its transparency, resulting in biases, the kinds of applications that can be implemented and the degree of workforce replacement in decision making assistance. It is essential to analyze the widely used AI techniques, the application of these technologies in different sectors, the implications of AI and robotics on society and welfare and more. The Handbook of Research on Applied Artificial Intelligence and Robotics for Government Processes presents state of the art research on AI and robotics in different fields of knowledge, its benefits, applications and implications. It features chapters containing theoretical and practical research that analyzes the transparency and expandability of AI in different fields as well as the analysis of unexpected results, biases and cases of discrimination. Covering topics such as criminal intelligence, artificial intelligence based chatbots and gender violence, this major reference work is an excellent resource for government officials, practitioners in the public sector, business administrators and managers, IT professionals, law enforcement, federal agencies, students and faculty of higher education, researchers and academicians.
