Laws of the Sea assembles scholars from law geography anthropology and environmental humanities to consider the possibilities of a critical ocean approach in legal studies Unlike the United Nations monumental Convention on the Law of the Sea which imagines one comprehensive constitutional framework for governing the ocean *Laws of the Sea* approaches oceanic law in plural and dynamic ways Critically engaging contemporary concerns about the fate of the ocean the collection s twelve chapters range from hydrothermal vents through the continental shelf and marine genetic resources to coastal communities in France Sweden Florida and Indonesia Documenting the longstanding binary of land and sea the chapters pose a fundamental challenge to European law s terracentrism and its pervasive influence on juridical modes of knowing and making the world Together the chapters ask is contemporary Eurocentric law and international law in particular capable of moving away from its capitalist and colonial legacies established through myriad oceanic abstractions and classifications toward more amphibious legalities *Laws of the Sea* will appeal to legal scholars geographers anthropologists cultural and political theorists as well as scholars in the environmental humanities political ecology ocean studies and animal studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Oceans and Society Ana Spalding, Daniel Suman, 2023-02-28 This unique textbook presents an introduction to the interdisciplinary field of marine studies exploring the dynamic relationship between people and the marine environment Emphasizing the human dimension of coastal and ocean

issues the book provides an innovative examination of the complex marine human environment dynamics by drawing on social science and humanities approaches. Applying these interdisciplinary approaches, the textbook addresses key challenges facing the marine environment, including changing climate, fisheries, aquaculture, marine pollution, energy production, and management of areas beyond national jurisdiction. While leading with a human dimension approach to these challenges, the chapters are all firmly grounded in foundational knowledge about coastal and ocean environments and processes. The textbook also includes examples of professional or academic areas of specialization within marine studies, such as social and environmental justice, governance, global perspectives, traditional ecological knowledge and management, entrepreneurship, community development, conservation, and the blue economy. Ultimately, the book provides the first cohesive resource on marine studies to educate students, train interdisciplinary marine leaders, inspire new knowledge about people and the sea, generate innovative solutions for sustainable oceans, and build capacity for a new generation of marine-focused professionals. *Oceans and Society* is essential reading for students on marine studies courses as well as those studying marine governance, policy, conservation, and law more broadly. It will also be of great interest to students, researchers, and professionals interested in applying interdisciplinary approaches to environmental challenges.
