Governance Of Science Issues In Society:

Governance as a Dialogue: Government-Society-Science in Transition Anthony R. Turton, Johanna Hanlie Hattingh, Gillian A. Maree, Dirk J. Roux, Marius Claassen, Wilma F. Strydom, 2007-02-16 The last two decades have been marked by a dramatic increase in global attention to the concept of governance especially in relation to the effective and sustainable management of natural resources During this period issues of water governance have received particular attention for example in relation to the provision of reliable water supplies as a catalyst for poverty eradication Within the context of the Millennium Development Goals and against a backdrop of an increasing frequency of water crises ranging from widespread flooding to severe water scarcity it is essential that each country and particularly those countries that face development challenges should be in a position to ensure that access to water is available to those who need it most This issue has been highlighted by the Global Water Partnership which stated that the water crisis facing the world is in reality a crisis of governance The South African political environment has changed dramatically in recent years and the central concepts of social equity and the right to a healthy environment are now entrenched in the country's Constitution These concepts are supported by several new laws in particular the National Environmental Management Act and the National Water Act which in turn are based on the principles of sustainable development However despite the highly desirable attributes of these landmark pieces of legislation South African authorities are still struggling to implement the requirements of these Acts almost a decade after their promulgation *The governance of science* Steve Fuller, 2000 **Science, Technology and Global Governance** John R. De La Mothe, 2014-04-23 Science technology and innovation have long been key factors in the competitive advantage of nations Today however the new international political economy is being increasingly driven by science and technology in new ways Integration globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated As a result not only are the policies of national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in today's emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues **Governance of Science** Steve Fuller, 1999-12-16 What does social and political theory have to say about the role of science in society Do scientists and other professional enquirers have an unlimited right to be wrong What are the implications of capitalism and multiculturalism for the future of the university This ground breaking text offers a fresh perspective on the governance of science from the standpoint of social and political theory Science has often been seen as the only institution that embodies

the elusive democratic ideal of the open society Yet science remains an elite activity that commands much more public trust than understanding even though science has become increasingly entangled with larger political and economic issues Fuller proceeds by rejecting liberal and communitarian ideologies of science in favour of a republican approach centred on the right to be wrong He shows how the recent scaling up of scientific activity has undermined the republican ideal The centrepiece of the book a social history of the struggle to render the university a republic of science focuses on the potential challenges posed by multiculturalism and capitalism Finally drawing on the science policy of the US New Deal Fuller proposes nothing short of a new social contract for secularizing science

Strategic Science in the Public Interest G. Bruce Doern, Jeffrey S. Kinder, Jeff Kinder, 2007-01-01 The past twenty years have seen considerable shifts and struggles in government science that is in the way the state funds supports regulates conducts and uses scientific and technological activity Focusing on federal labs and agencies Strategic Science in the Public Interest explores how these labs have been located within and often buried by the larger commercially focussed federal innovation agenda G Bruce Doern and Jeffrey S Kinder examine four labs whose mandates deal with the Alberta oil sands environmental technologies wildlife research and mining and metals respectively The authors use these cases to explain why

a better middle level approach to analysis is needed for strategic public interest centred government science They illustrate the importance of understanding the variety as well as the similarity of federal science and technology labs and agencies and of instituting policies that reflect this diversity The growing importance of Related Science Activities RSA is also explored as well as the core trade offs between commercial and public goods science in their mandates and their internal capacities

International Encyclopedia of Political Science Bertrand Badie,Dirk Berg-Schlosser,Leonardo Morlino,2011-09-07 With entries from leading international scholars from around the world this eight volume encyclopedia offers the widest possible coverage of key areas both regionally and globally The International Encyclopedia of Political Science provides a definitive comprehensive picture of all aspects of political life recognizing the theoretical and cultural pluralism of our approaches and including findings from the far corners of the world The eight volumes cover every field of politics from political theory and methodology to political sociology comparative politics public policies and international relations Entries are arranged in alphabetical order and a list of entries by subject area appears in the front of each volume for ease of use The encyclopedia contains a detailed index as well as extensive bibliographical references Filling the need for an exhaustive overview of the empirical findings and reflections on politics this reference resource is suited for undergraduate or graduate students who wish to be informed effectively and quickly on their field of study for scholars seeking information on relevant research findings in their area of specialization or in related fields and for lay readers who may lack a formal background in political science but have an interest in the field nonetheless The International Encyclopedia of Political Science provides an essential authoritative guide to the state of political science at the start of the 21st century and for decades to come making it an invaluable resource for a global readership including researchers students citizens and policy makers The encyclopedia was developed in partnership with the International Political Science Association Key Themes Case and Area Studies Comparative Politics Theory and Methods Democracy and Democratization Economics Epistemological Foundations Equality and Inequality Gender and Race Ethnicity International Relations Local Government Peace War and Conflict Resolution People and Organizations Political Economy Political Parties Political Sociology Public Policy and Administration Qualitative Methods Quantitative Methods Religion **Bridges between Science, Society and Policy** Michael Decker,Miltos Ladikas,2013-03-09 The Europäische Akademie zur Erforschung von Folgen wissenschaftlich technischer Entwicklungen Bad Neuenahr Ahrweiler GmbH european academy is concerned with the scientific study of the consequences of scientific and technological advance for the individual and social life and for the natural environment The main focus is to examine foreseeable mid and long term processes that are especially influenced by natural and engineering sciences and the medical

disciplines The academy fulfills this task by organizing interdisciplinary expert discussions Another important issue of the work of the Europäische Akademie concerns the methodology of Technology Assessment as a general issue This is the main reason that the European academy organized during the past two years a project funded by the European Commission on Technology Assessment Methods and Impact TAMI Together with partners from all over Europe a common understanding of what Technology Assessment TA is supposed to do was developed Most importantly it was acknowledged that the core of any TA activity has to be a sound scientific understanding of the relevant phenomena Communication then is of cardinal importance to reach the relevant decision makers as well as the general public It is true that this phase of the TA process has been treated with too little attention for many years The communication processes between scientific advisers and policy makers have hence to be further scrutinized

Public Participation, Science and Society Mikko Rask, Saulė Mačiukaitė-Žvinienė, Loreta Tauginienė, Vytautas Dikčius, Kaisa Matschoss, Timo Aarveaara, Luciano d'Andrea, 2018-01-12 The field of public participation is developing fast with phenomena such as citizen science and crowdsourcing extending the resource base of research stimulating innovation and making science more accessible to the general population Promoting public participation means giving more weight to citizens and civil society actors in the definition of research needs and in the implementation of research and innovation As yet there is limited understanding of the implications of widespread use of public participation and as a result there is a risk that it will become a burden for research and an obstacle to bridging the gap between research and society This volume presents the findings of a three year international study on innovative public participation The resulting work studies the characteristics and trends of innovative public participation through a global sample of 38 case studies It provides theoretical generalisations on the dynamics of public participation suggestions for an evaluation framework and clear empirical examples of how public participation works in practice Illustrated by best practice cases the authors identify characteristics which contribute to successful public participation The book is aimed primarily at scholars and practitioners of public participation as well as research managers policy makers and business actors interested in related issues There is also a secondary market for students and scholars of European governance studies sociology and political sciences

Routledge Handbook of Science, Technology, and Society Daniel Lee Kleinman, Kelly Moore, 2014-06-05 Over the last decade or so the field of science and technology studies STS has become an intellectually dynamic interdisciplinary arena Concepts methods and theoretical perspectives are being drawn both from long established and relatively young disciplines From its origins in philosophical and political debates about the creation and use of scientific knowledge STS has become a wide and deep space for the consideration of the place of science and technology in the world past and present The Routledge Handbook of Science Technology and Society seeks to capture the dynamism and breadth of the field by
