Governing Children Families And Education Restructuring The Welfare State:

Governing Children, Families and Education Marianne N. Bloch, Thomas Popkewitz, Kerstin Holmlund, Ingeborg Moqvist, 2003-12-12 Global reforms in welfare state provisions entail changes in family and school responsibilities governmental responsibilities about who should care for and educate children and the images and narratives of what the family and child are and should be In *Governing Children Families and Education* an international interdisciplinary group of social scientists and historians explore the politics of these changing patterns in this groundbreaking book at two levels structural examinations of the re distribution of power as it relates to class gender and race and the mentalities that govern the relation of the private or public responsibilities of families and the child in care of the state and schools

Governing Children, Families and Education M. Bloch, Thomas S. Popkewitz, K. Holmlund, I. Moqvist, 2016-09-27 This is a collection of essays that address the international changes in welfare policy The book discusses the new patterns of governing associated with the notions of welfare care and education that emerge during the late Twentieth and early Twenty first centuries The issues examined are among others the role of international donors and their emphasis on efficiency and lower social subsidies international migration and its impact on welfare policy inclusions and exclusions and national policy change While representing many different locations and traditions contributors work within a variety of critical theoretical perspectives that critique our cultural ways of reasoning about the care and education of the child the role and practice of the state and the social and cultural construction of citizenship and nationhood

Knowledge, Politics and the History of Education Jesper Eckhardt Larsen, 2012 The humanities and social science disciplines are increasingly expected to prove their relevance faced with the politics of knowledge in the knowledge economy This tendency is investigated in this book regarding the discipline of the history of education in America and Europe

The Government of Childhood K. Smith, 2014-10-06 Grounded in the Foucauldian literature on governmentality and drawing on a broad range of disciplines this book examines the government of childhood in the West from the early modern period to the present The book deals with three key time periods and examines shifts in the conceptualization and regulation of childhood and child rearing

Handbook of Research on the Education of Young Children Bernard Spodek, Olivia N. Saracho, 2014-01-27 The Handbook of Research on the Education of Young Children Second Edition is an essential reference on research in early childhood education not only in the United States but throughout the world It provides a comprehensive overview of important contemporary issues and the information necessary to make judgments about these issues The field has changed significantly since the publication of the first edition of this Handbook in 1993 creating a need for an update The Handbook of Research on the Education of Young Children Second Edition is thus focused on research conducted over the past decade or so The volume is organized in four parts Early Childhood Education and Child Development New in this edition moral development the development of creativity Early Childhood Educational Curriculum New in this edition movement or dance education the education of linguistically and

culturally diverse children Foundations of Early Childhood Educational Policy New in this edition childhood poverty the education of bilingual children Research and Evaluation Strategies for Early Childhood Education New in this edition doing historical research in early childhood education postmodern and feminist orientations The Handbook of Research on the Education of Young Children Second Edition makes the expanding knowledge base related to early childhood education readily available and accessible It is a valuable tool for all who work and study in the field *The Claims of Parenting* Stefan Ramaekers, Judith Suissa, 2011-09-15 Many sociological historical and cultural stories can be and have already been told about why it is that parents in post industrial western societies face an often overwhelming array of advice on how to bring up their children At the same time there have been several philosophical treatments of the legal moral and political issues surrounding issues of procreation the rights of children and the duties of parents as well as some philosophical accounts of the shifts in our underlying conceptualization of childhood and adult child relationships While this book partly builds on the insights of this literature it is significantly different in that it offers a philosophically informed discussion of the actual practical experience of being a parent with its deliberations judgements and dilemmas In probing the ethical and conceptual questions suggested by the parent child relationship this unique volume demonstrates the irreducible philosophical richness of this relationship and thus provides an important counter balance to the overly empirical and largely psychological focus of a great deal of parenting literature Unlike other analytic work on the parent child relationship and the educational role of parents this work draws on first person accounts of the day to day experience of being a parent in order to explore the ethical and epistemological aspects of this experience In so doing it exposes the limitations of some of the languages within which contemporary parenting is conceptualized and discussed and opens up a space for thinking about childrearing and the parent child relationship beyond and other than in terms of the languages which dominate the ways in which we generally think about it today **Beyond Listening** Clark, Alison, Peter Moss, Kjørholt, Anne Trine, 2005-10-19 From both an international perspective and through combining theory practice and reflection this book examines critically how listening to young children in early childhood services is understood and practiced Early Childhood and Compulsory Education Peter Moss, Lucia Balduzzi, 2013 What should be the relationship between early childhood and compulsory education What can they learn from one another and by working together The rapid expansion of early childhood education and care means that most children in affluent countries now have several years at pre school before compulsory education This raises an important question about the relationship between the two Whilst it is widely assumed that the former should prepare children for the latter there are alternatives This book contests the readying for school relationship as neither self evident nor unproblematic and explores some alternative relationships including a strong and equal partnership and the vision of a meeting place In this ground breaking book Professor Peter Moss discusses the issue with leading early childhood figures from Belgium France Italy New Zealand Norway Sweden and the United States who bring very different perspectives to this contentious

relationship The book starts with an extended essay by Peter Moss to which the other contributors are invited to respond critically as well as offering their own thinking about the relationship between early childhood and compulsory education both their current understandings and suggestions on future directions Students researchers and academics in the field of early childhood education will find this an insightful and timely text But so too will their peers in compulsory education since the book time and again raises searching questions about pedagogical purpose and practice in this sector

Movement and Experimentation in Young Children's Learning Liselott Mariett Olsson, 2009-02-27 In contemporary educational contexts young children and learning are tamed predicted supervised controlled and evaluated according to predetermined standards Contesting such intense governing of the learning child this book argues that the challenge to practice and research is to find ways of regaining movement and experimentation in subjectivity and learning Vivid examples from Swedish preschools involving children teachers teacher students and educators and researchers are woven together with the theories of French philosophers Gilles Deleuze and Félix Guattari bringing important new concepts and practices to the early childhood field This ground breaking book investigates three key areas the need to focus on process rather than position as positioning of any kind such as learning goals or developmental stages hampers movement working with methods that recognise science s inventiveness and productivity demonstrating how the events in which children take part can remain open ended and in movement Re considering the dichotomy between the individual and society as a cause and effect relationship which immobilizes subjectivity and learning and hinders experimentation Challenging dominant ways of thinking *Movement and Experimentation in Young Children's Learning* offers new possibilities for change and provokes a re evaluation of the educational system s current emphasis on predetermined outcomes and fixed positions This book provides researcher and students with a sound theoretical framework for re conceptualising significant aspects of movement and experimentation in early childhood Its many practical illustrations make this a compelling and provocative read for and student taking course in Early Childhood Studies

The SAGE Handbook of Child Research Gary B Melton, Asher Ben-Arieh, Judith Cashmore, Gail S. Goodman, Natalie K. Worley, 2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus The volume s editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children James Garbarino Loyola University Chicago Covers a satisfying and unprecedentedly wide range of research relating to childhood The contributors include many eminent international scholars of childhood making the book a valuable resource for child researchers Child advocates will also find the book to be invaluable in their efforts to improve children s well being and to change policies and practices for the better Anne Smith University of Otago A really scintillating collection that will provide a lasting perspective on child studies stimulating and comprehensive Jonathan Bradshaw University of York In keeping with global changes in children s social and legal status this Handbook includes examination of children as family members friends learners consumers people

of faith and participants in law and politics The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective The book is divided into three parts Part I Setting Specific Issues in Child Research Part II Population Specific Issues in Child Research Part III Methods in Research on Children and Childhood The Confessing Society Andreas Fejes, Magnus Dahlstedt, 2013-05-02 I highly appreciate the quality of Fejes and Dahlstedt's research and writing They manage to present in a comprehensible way some essential concepts of Foucault that help us to understand better what practices of lifelong learning in a broad sense are emerging nowadays in advanced liberal societies In doing so they contribute to the renewal of critical thinking in education They convince me that such renewal is important and necessary and I think both theoreticians and practitioners of lifelong learning will equally recognize and value this analysis particularly also because they present a good mix of theory and practice Professor Danny Wildemeersch Today people are constantly encouraged to verbalise and disclose their true inner self to others whether on TV shows in newspapers in family life or together with friends Such encouragement to disclose the self has proliferated through discourses on lifelong learning through which each citizen is encouraged to become a constant learner The Confessing Society takes a critical stance towards the modern relentless will to disclose the self and argues that society has become a confessing society Drawing on Foucault's later work on confession and governmentality this book carefully analyses how confession operates within practices of lifelong learning as a way to shape activated and responsible citizens and provides examples of how it might be possible to traverse the confessional truth of the present time Chapters include Reflection and Reflective Practices Deliberation and Therapeutic Intervention Lifelong Guidance Medialised Parenting This controversial book is international in its scope and pursues current debates regarding trans national policy and to research discussions on education lifelong learning and governance and it will provoke lively debate amongst educational practitioners academics postgraduate and research students in education and lifelong learning in Europe North America and Australasia *Educating for Social Justice in Early Childhood* Shirley A. Kessler, Beth Blue Swadener, 2019-09-10 Bringing together scholarship and examples from practice this book explores ways in which early childhood curriculum including classroom practices and community contexts can more actively engage with a range of social justice issues democratic principles and anti oppressive practices Featuring a stellar list of expert contributors the chapters in this volume present a cross section of contemporary issues in childhood education The text highlights the voices of children teachers and families as they reflect on everyday experiences related to issues of social justice inclusion and oppression as well as ways young children and their teachers engage in activism Chapters explore curriculum and programs that address justice issues particularly educating for democracy and culminate in a focus on the future offering examples of resistance and visions of hope and possibility Designed for practitioners graduate students and researchers in early childhood this book challenges readers to explore the ways in which early childhood education is and can be engaging with

social justice and democratic practices **Rethinking Children's Citizenship** T. Cockburn, 2012-11-16 This book explores the relationship between children and citizenship analyzing international perspectives on citizenship and human rights and developing new methods for facilitating the recognition of children as participating agents within society **Children Framing Childhoods** Wendy Luttrell, 2020-02-12 Urban educational research practice and policy is preoccupied with problems brokenness stigma and blame As a result too many people are unable to recognize the capacities and desires of children and youth growing up in working class communities This book offers an alternative angle of vision animated by young people s own photographs videos and perspectives over time It shows how a racially ethnically and linguistically diverse community of young people in Worcester MA used cameras at different ages 10 12 16 and 18 to capture and value the centrality of care in their lives homes and classrooms Luttrell s immersive creative and layered analysis of the young people s images and narratives boldly refutes biased assumptions about working class childhoods and re envisions schools as inclusive imaginative and care ful spaces With an accompanying website featuring additional digital resources childrenframingchildhoods.com this book challenges us to see differently and thus set our sights on a better future **The Struggle for the History of Education** Gary McCulloch, 2011-02-25 In *The Struggle for History Education* Gary McCulloch sets out a vision for a future of study in the history of education which contributes to education history and social sciences alike What Matters? Courtney Bender, Ann Taves, 2012 This collection of essays examines religious secular and spiritual distinctions in society Rethinking Readiness in Early Childhood Education Jeanne Marie Iorio, Will Parnell, 2015-02-18 This book challenges traditional conceptions of readiness in early childhood education by sharing concrete examples of practice policy and histories that rethink readiness This book seeks to reimagine possible new educational worlds for young children *Voice in Qualitative Inquiry* Alecia Y Jackson, Lisa A Mazzei, 2008-09-02 *Voice in Qualitative Inquiry* is a critical response to conventional interpretive and critical conceptions of voice in qualitative inquiry A select group of contributors focus collectively on the question What does it mean to work the limits of voice from theoretical methodological and interpretative positions and the result is an innovative challenge to traditional notions of voice The thought provoking book will shift qualitative inquiry away from upproblematically engaging in practices and interpretations that limit what counts as voice and therefore data The loss and betrayal of comfort and authority when qualitative researchers work the limits of voice will lead to new disruptions and irruptions in making meaning from data and in turn will add inventive and critical dialogue to the conversation about voice in qualitative inquiry Toward this end the book will specifically address the following objectives To promote an examination of how voice functions to communicate in qualitative research To expose the excesses and instabilities of voice in qualitative research To present theoretical methodological and interpretative implications that result in a problematizing of voice To provide working examples of how qualitative methodologists are engaging the multiple layers of voice and meaning To deconstruct the epistemological limits of voice that circumscribe our view of the world and

the ways in which we make meaning as researchers This compelling collection will challenge those who conduct qualitative inquiry to think differently about how they collect analyze and represent meaning using the voices of others as well as their own

Relation Between School and Family in the Community Dany Boulanger, 2025-09-24 Relation Between School and Family in the Community explores a number of crucial issues affecting the triadic dialogue between school family and community from a cultural psychology perspective

Alternative Narratives in Early Childhood Peter Moss, 2018-07-11 Challenging dominant discourses in the field of early childhood education this book provides an accessible introduction to some of the alternative narratives and diverse perspectives that are increasingly to be heard in this field as well as discussing the importance of paradigm politics and ethics Peter Moss draws on material published in the groundbreaking Contesting Early Childhood series to introduce readers to thinking that questions the mainstream approach to early childhood education and to offer rich examples to illustrate how this thinking is being put to work in practice Key topics addressed include dominant discourses in today s early childhood education and what is meant by dominant discourse why politics and ethics are the starting points for early childhood education Reggio Emilia as an example of an alternative narrative the relevance to early childhood education of thinkers such as Michel Foucault and Gilles Deleuze and of theoretical positions such as posthumanism An enlightening read for students and practitioners as well as policymakers academics and parents this book is intended for anyone who wants to think more about early childhood education and delve deeper into new perspectives and debates in this field
