Governing Europe's Spaces European Union Re Imagined European Policy Research Unit Series Mup:

Governing Europe's spaces Caitriona Carter, Martin Lawn, 2015-07-20 What do we imagine when we imagine Europe and the European Union To what extent is our understanding of the EU of its development its policies and its working processes shaped by unacknowledged assumptions about what Europe really is The book constructs a case for re imagining Europe not as an entity in Brussels or a series of fixed relations but as a simultaneously real and imagined space of action which exists to the extent that Europeans and others act in and on it This Europe is constantly being made in particular spaces through specific actor struggles whose interconnections are often ill defined We ask how do those concerned with building Europe with extending and elaborating the EU think of where they are and what they are doing The book captures Europeans in the process of making Europe of performing interpreting modelling referencing consulting measuring and de politicising Europe

New Europe Donald McNeill, 2014-05-12 New Europe Imagined Spaces traces the radical transformation of European places and spaces over the last two decades Instead of the familiar schoolbook map of a Europe of nation states the book unpacks the differing imaginations of European identity in recent years Taking as its central problem the fluid nature of cultural and political identity it moves firmly away from and calls into question the perspective of the nation state as the primary source of imagined identity for Europeans The book contributes to key debates such as the emerging Europe of the Regions and the return of the city state examines the rebranding of the nation state and explores the impact of Europeanisation on existing place identity Emphasising mobility and movement the chapters explore borderlands and travel and also include a detailed discussion of the everyday life of Europeans Throughout iconic images of contemporary Europe are invoked Eurodisney the Reichstag Barcelona's Ramblas and the Bilbao Guggenheim and the way in which mundane artefacts and practices such as football walking cars food passports and the

studying the impact of European policies on member states Focusing especially on transport policy the authors employ an empirically rich set of case studies to demonstrate convincingly that this influence depends on pre existing policies and institutional capacity to change Depending on the particular phase of regulation in which a country finds itself and on its institutional flexibility an identical EU policy has remarkably diverse impacts within individual member states Visit our website for sample chapters The Transformation of Governance in the European Union Beate Kohler-Koch,Rainer Eising,1999 The book presents a theoretically informed typology of modes of governance which is tested in a careful selection of comparative country and policy studies At the core is the question whether the European Union is destined to a network type of governance and whether and how this type of governance will be translated into the member states The individual chapters subject the governing patterns at European and national level to empirical scrutiny Drawing on recent research findings in different issue areas including monetary union social affairs environment genetic engineering and market liberalisation in transport banking energy professional services the contributions highlight the impact of the European activities on policy making process in the member states **Frameworks of the European Union's Policy Process** Nikolaos Zahariadis,2017-07-05 The book advances the state of the European Union s policy theory by taking stock of seven promising frameworks of the policy process systematically comparing their limitations and strengths and offering a strategy to develop robust research agendas Frameworks may constitute competing policy explanations depending on assumptions they make about EU institutional and issue complexity The frameworks include detailed analyses of multi level governance advocacy coalitions punctuated equilibrium multiple streams policy learning normative power Europe and constructivism Besides generating a fertile dialogue that transcends the narrow confines of EU policy contributions highlight the value of intellectual pluralism and the need for clear and rigorous explanations of the policy process This book was published as a special issue of the Journal of European Public Policy **The Regional and Urban Policy of the European Union** Philip McCann,2015-01-30 The regional and urban development policy of the European Union or more precisely EU Cohesion Policy is undergoing change This development is driven by the enormous transformations in European regions and by shifts in thinking and analysis The iss Urban Policy in the European Union Maria Tofarides,2018-05-08 This title was first published in 2003 This book examines the development of urban policy instruments at the level of the EU primarily by the use of Structural Funds under the European Commission s Directorate General for Regional Policy This is the first book length analysis of the politics of EU urban policy The first section of the book concentrates on how and why the European Commission with no clear mandate from the Treaties for an urban policy has ventured into this area The second section examines in detail the implementation of one of these instruments in two specific cases London and Marseilles This highlights the role of central and other levels of government in policy implementation The comparison between the cases brings important insights into the differences in local political structures and practices in France and the United Kingdom

Europeanization Alun Jones,Julian Clark,2024-03-08 Europeanization is increasingly fashionable in the social sciences as a research focus as well as a backdrop for studies of the European Union and its relations with its member states However to date there is little consensus among the scholarly community over what Europeanization is or how it should be analyzed Spatialities of Europeanization is the first work to comprehensively analyze contemporary research across the social sciences and humanities in order to bring together critically informed and previously unconnected contributions on this vital topic The authors identify unexplored communalities between these different research traditions as well as shedding light on its neglected geographical and spatial dimensions which they argue are critical to understanding Europeanization in the 21st century This book reflects a strong conceptual approach which is supported by detailed empirical materials drawn from interviews with policy elites at supranational national and regional levels in the EU who are engaged in short medium and long term EU policy planning and management Offering fascinating empirically grounded insights into why Europe s governance must now become more transparent and accountable to its 500 million citizens this book will appeal to scholars and researchers in the fields of Political Science International and European Studies Governing Europe's Neighbourhood

Katja Weber, Michael Eugene Smith, Michael Baun, Elisabeth Johansson-Nogués, 2007 Europe in Search of Political Order
Johan P. Olsen, 2007-02-01 This book deals with ongoing processes of European cooperation and integration processes that may have a potential to change the political organization of Europe Based on ideas from the new institutionalism the book offers a systematic perspective on institutional change and in particular the role of institutions in relation to four central and durable issues in the study of political life These are 1 the mediation between unity and diversity what ties a society together and what keeps it apart 2 The relations between citizens and their helpers why the democratic deficit in the European Union can not be eliminated solely by making mechanisms of direct citizens participation and representation more efficient Needed are also institutions that make direct participation redundant because they routinely work with integrity generating expected and desired outcomes 3 The relation between democratic design and historical drift To what degree democracies are able to design and reform key institutions of governance so that their structures reflect popular will understanding and control 4 The co existence of old and new political orders How elements of a new order may supplement rather than replace elements of the old order generating a mixed order based on partly inconsistent principles and rules
