Governing China From Revolution Through Reform 2nd Edition:

Governing China Kenneth Lieberthal, 1995 Looks at the history of Chinese government from the original imperial system to the current communist government and describes some of the challenges China faces in the future *China Reconnects: Joining A Deep-rooted Past To A New World Order* Gungwu Wang, 2019-07-02 The book is engaging informative and provocative and can profitably be read by undergraduates and professors alike You do not have to agree with the dean of China studies to learn from him China Review International The book shows how the Chinese are now confident of their capacity to learn all they need from the developed world and are keen to know which parts of the past they would need to build a modern Chinese civilization They are very conscious of the challenges coming from the United States and are looking for ways and means to respond to a superpower that wants to preserve its dominant position in the international status quo The book seeks to explain what China is doing and what its immediate and long term interests are It is not to defend or judge China It does not employ theoretical frameworks that are not appropriate for describing Chinese conditions It calls for understanding why history is particularly relevant to the Chinese state and most of its people That way we also see how the present and hopes for the future changes our perspectives of the past Related Link s *Higher Education as a Field of Study in China* Xin Wang, 2010-03-18 Higher Education as a Field of Study in China Defining Knowledge and Curriculum Structure concerns the complexity of higher education as an academic field the evolving nature of the field in light of the overall development of higher education in China It reviews how higher education as a field of study has evolved in China since 1978 and how the field has been shaped by political and social forces as well as institutional culture Xin Wang argues that higher education is becoming an interdisciplinary field rather than a subfield under the discipline of education especially when higher education has become an enterprise with such a broad scope in China Wang also expresses a belief that the field of higher education is being challenged by the professional need for preparing and training competent professionals for various administrative positions in China Higher education as a field will be professionalized with its own knowledge base and a set of skills in applying this knowledge to practical areas This book also provides an account of the U S model of higher education as an example how the field was formed and developed how it has evolved from a generalized area of inquiry into a professional specialization how programs of higher education are structured what classes they offer and what challenges they face The U S model presents a comparative perspective for Chinese scholars and program directors about higher education as a field of study **Work Safety Regulation in China** Jie Gao, 2022-03-31 Fatality quotas implemented in China s industrial section and local governments are being used to promote work safety and therefore reducing the number of work related deaths Given the controversial nature of this policy Gao analyzes how the fatality quotas are functioning to aid the country in balancing economic growth and social stability The book also examines significant implications caused of this policy s implementation in the local regions and reveals how local officials attempt to handle these problems This is the

first book to systematically examine the role of death indicators in work safety improvement in contemporary China revealing insight into Beijing's quota oriented approach to policy making *The Economic and Strategic Rise of China and India* D. Denoon, 2007-09-03 This book demonstrates the connection between economic and strategic developments in Asia with several interrelated arguments The author asserts that there is no single explanation for the 1997 financial crisis in the Pacific Rim states nor for the slow recovery afterwards The author also points out that China is not the only major power rising in Asia India is close behind and warns that while many observers are proceeding as if current U S treaties will continue indefinitely Asia is already preparing for changing patrons *Authoritarian Legality in China* Mary E. Gallagher, 2017-09-07 This book examines Chinese workers experiences and shows how disenchantment with the legal system drives workers from the courtroom to the streets **Chinese Politics** Daniel Lynch, Stanley Rosen, 2024-04-18 Written by a team of leading China specialists this updated 2nd edition of Chinese Politics explores the dynamics of state power and politics in contemporary China focusing on the Xi Jinping era Through its multi disciplinary contributions this book explores the extent to which Xi has reshaped the political economic socio cultural and demographic terrains of the PRC as well as Beijing's foreign policy The book will help readers to think productively about the trajectory of these aspects of Chinese politics and society through Xi's current term and beyond The book also highlights the potential role outside countries and non state actors might play in shaping China's trajectory as the PRC's economic rise may be stalling Through each exploration of these issues the book addresses the central question of what The Xi Jinping Difference has been and will likely continue to be in Chinese politics Key subjects covered in this new edition include Law and the political system Socialization of youth The fate of the private sector Technology and digital authoritarianism The Belt and Road Initiative Population aging Chinese Politics continues to be an essential textbook for all students of contemporary China as well as scholars interested in the dynamics of political and social change *China's International Behavior* Evan S. Chinese courts are organized as a singular and unified system yet grassroots courts in urban and rural regions differ greatly in the way they use the law and are as diverse as the populations they serve. Based on extensive fieldwork and in-depth interviews, this book offers a penetrating discussion of the operation of Chinese courts. It explains how Chinese judges rule and how the law is not the only script they follow. Political, administrative, social, and economic factors all influence verdicts. This landmark work will revise our understanding of the role of law in China, one that cannot be easily understood through the standard lens of judicial independence and separation of powers. Ng and He make clear the struggle facing frontline judges as they bridge the gap between a rule-based application of law and an instrumentalist view that prioritizes stability maintenance.

Building New China, Colonizing Kokonor Gregory Rohlf, 2016-03-04. *Building New China: Colonizing Kokonor* Resettlement to Amdo and Qinghai in the 1950s examines rural resettlement to the Sino-Tibetan cultural borderlands in the 1950s. More than 100,000 eastern Han and Hui Chinese were sent to Qinghai province, known in Mongolian as Kokonor, and Amdo to Tibetans to plow up new fields in areas that were being incorporated into the Chinese state for the first time. The settlers were to bring their skilled labor, literacy, and modern thinking to backward Qinghai to fully exploit its natural resources of oil, natural gas, gold, and empty lands for the benefit of the industrializing nation. The book is a social and political history of resettlement focusing on the people who were moved and the overall impact the program had on the province. It is a frontier history, but it also narrates a story of state building in modern China that spans the twentieth century and the opening years of the twenty-first. Chinese Communist Party School and its Suzhi Education Chunqi Zhou, 2023-03-03. Zhou applies network governance theories to Chinese education and focuses on Chinese education policy implementation, particularly with the Chinese Communist Party Schools (CCPS). The CCPS is the institution which follows the Chinese Communist Party (CCP)'s ideas and decisions to educate key education leaders at all levels with different political purposes. In the Chinese education policymaking process, the CCP is the leading power which provides policy directions, but the education department is the main vehicle for the delivery of education policy. Using document analysis and interviews, Zhou argues that an education policy implementation process can be successful from top to bottom level in cooperation with the education department. He further posits that formulating and implementing Chinese education policy can be characterised as a form of network governance which coordinates actors and stakeholders' motivation to comply with collective decisions in Chinese education implementation. The book offers fresh data for the study of policy networks in Chinese education, the study of CCPS, and Chinese network governance. This book will be of interest to scholars and postgraduate students studying Chinese education, comparative educational policy, and comparative education research. **China: A History** Harold Miles
