Governing Metropolitan Areas David K. Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance *Governing Metropolitan Areas* describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance

Metropolitan Governance in America Donald F. Norris, 2016-03-09 Metropolitan government and metropolitan governance have been ongoing issues for more than sixty years in the United States Based on an extensive survey and a review of existing literature this book offers a comprehensive overview of these debates It discusses how the centrifugal forces in local government and in particular local government autonomy have produced a highly fragmented governmental landscape throughout America It argues that in order for governance to occur in metropolitan areas or anywhere else for that matter there has to be some form of an actual governmental institution that possesses the power and ability to compel compliance Everything else is just some form of cooperation and while cooperation is not trivial it does not enable metropolitan areas to address the really tough and controversial issues that divide rather than unite governments in those areas The book examines the principal factors that prevent the development of either metropolitan government or metropolitan governance in the USA Norris looks at several examples where some form of metropolitan government or governance can be said to exist from voluntary cooperation the weakest to government the strongest He also examines each type of arrangement for its ability to address metropolitan wide problems and whether each type is or is not in use in the USA In sum the book uncovers the extent of metropolitan government and governance the possibility for its existence what attempts if any have been made in the past and the problems and issues that have arisen due to the lack of adequate metropolitan governance

Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems particularly related to inter governmental cooperation among local governments and different levels of government In many cases an increased number of governments has increased administrative costs
