Air Assault derives from two types of operations known as Air Mobility and Vertical Envelopment Air Mobility Operations
were de veloped by the German Army during WWII in the 1930 s The US Army soon adopted this method of offensive
operations in 1941 using wooden gliders The glider was assisted into the air by being towed by a larger aircraft and then
released The pilot had to navigate the large glider loaded with a team of infantry soldiers to the landing zone behind enemy
lines at night and attempt to land safely Once the pilot landed the glider he would join the mission as another infantry soldier
with the team that he flew in Although the gliders and techniques used were advanced for that time period they did pose
some disadvantages Once the aircraft was landed safely that team of soldiers were cut off from allied troops Pilots had to be
cross trained with infantry tactics so he could operate as both roles The air mobility glider was abandoned after WWII after
