Renewable Electricity and Sustainability Prospects in Developing Economies is the first book of its kind to be dedicated entirely to the needs of emerging economies. It provides readers with a comprehensive review of current renewable energy technologies, their status in emerging economies, and the potential for sustainable renewable electricity generation in those countries. A multidisciplinary approach is used to assess the needs and challenges of each region, which is supported by quantitative analyses of the current and future potential for renewable electricity generation. Real world examples are also provided from the respective electricity sectors of each region. This resource is a unique reference for graduates and researchers on the social, technical, and economic landscape of renewable energy in emerging economies and would also be useful to NGOs and policymakers in developing countries or those working in sustainable development. Focuses specifically on the renewable energy and sustainability needs of developing economies. Explores the renewable energy potential of developing countries and how this can be converted to sustainable electricity generation supported by quantitative analyses and real world case studies. Addresses energy efficiency, energy management, and the socioeconomic aspects of renewable electricity generation in developing countries, in addition to each renewable energy resource.

,2000 *Cumulated Index Medicus* ,1991 **September 2023 - Surplus Record Machinery & Equipment** Tom Scanlan, SURPLUS RECORD is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 120 000 industrial assets since 1924, including metalworking and fabricating machine tools, lathes, CNC equipment, machine centers, woodworking equipment, food equipment, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1 100 businesses list with the SURPLUS RECORD. September 2023 issue Vol 100 No 9 Transformations in the Septuagint Theo A. W. van der Louw, 2007. This study inaugurates interaction between Septuagint research and Translation Studies. From the field of Translation Studies, the author has singled out approaches suited to LXX research. The historical survey of views of translation in Antiquity reveals that among Greeks, Romans, Egyptians, and Jews, similar disputes about language and translatability existed. Three Septuagint chapters, Genesis 2, Isaiah 1, and Proverbs 6, are analysed in depth, whereby the transformations shifts are categorised with help of linguistic Translation Studies. Before ascribing deviations either to the translator's ideology or to a variant in the Hebrew parent text, we must ascertain that the deviation does not have a purely translational origin. Every transformation has a reason, and by categorizing the reasons behind all transformations, one can trace the translational hierarchy that unconsciously guided the translator. The rationale behind a transformation can be detected by analysing the literal alternative which the translator rejected. The conclusions of this study are of importance for Translation Studies, Classical Studies, and Theology.
