Nye, 2004-05-26 A Brookings Institution Press and Visions of Governance for the 21st Century publication The latest in a series exploring twenty first century governance this new volume examines the use of market means to pursue public goals Market based governance includes both the delegation of

traditionally governmental functions to private players and the importation into government of market style management approaches and mechanisms of accountability The contributors all from Harvard University assess market based governance from four perspectives The demand side deals with new revised or newly important forms of interaction between government and the market where the public sector is the customer Chapters in this section include Steve Kelman on federal procurement reform Karen Eggleston and Richard Zeckhauser on contracting for health care and Peter Frumkin The supply side section deals with unsettled questions about government's role as a provider rather than a purchaser within the market system Contributors include Georges de Menil Frederick Schauer and Virginia Wise A third section explores experiments with market based arrangements for orchestrating accountability outside government by altering the incentives that operate inside market institutions Chapters include Robert Stavins on market based environmental policy Archon Fung on social markets and Cary Coglianese and David Lazer The final section examines both the upside and the downside of the market based approach to improving governance Contributors include Elaine Kamarck John D Donahue Mark Moore and Robert Behn An introduction by John D Donahue frames market based governance as an effort to engineer into public work some of the intensive accountability that characterizes markets without surrendering the extensive accountability of conventional government A preface by Joseph S Nye Jr sets the book in the context of a larger inquiry into the future of governance

modern society and potentially transform knowledge itself as a productive force Who Owns Knowledge asks such questions as What is the appropriate balance of public and private interests involved in this process How can creative powers natural resources and indigenous knowledge be protected from either public or private exploitation Does the law have the power to prevent this exploitation or is adaptive technology needed Also in this identity theft conscious age how can the rights of the individual be protected against policies allowing access to any kind of information especially confidential information The editors and contributors demonstrate that the relationship between knowledge and the law needs to be further researched and discussed Who Owns Knowledge is a must read for those interested in the subjects of intellectual property the history and development of modern legal and economic systems and their entanglements and how judicial systems make choices between the legal and economic systems and especially between the public and private good and their often opposing interests

Bair,2010-06-01 **Creating Cooperation** Pepper D. Culpepper,2018-07-05 In Creating Cooperation Pepper D Culpepper explains the successes and failures of human capital reforms adopted by the French and German governments in the 1990s Employers and employees both stand to gain from corporate investment in worker skills but uncertainty and mutual distrust among companies doom many policy initiatives to failure Higher skills benefit society as a whole so national governments want to foster them However business firms often will not invest in training that makes their workers more attractive to other employers even though they would prefer having better skilled workers Culpepper sees in European training programs a challenge typical of contemporary problems of public policy success increasingly depends on the ability of governments to convince private actors to cooperate with each other In the United States as in Europe he argues policy makers can achieve this goal only by incorporating the insights of private information into public policy Culpepper demonstrates that the lessons of decentralized cooperation extend to industrial and environmental policies In the final chapter he examines regional
