### Abstract

**Background:** One of the indicators of development in different countries is the efficiency of the health care system. Hospitals and health centers have a very important role in the sustainability of society as well as its economic growth and development. Meanwhile, one of the important development indicators of hospitals is good governance. This study was aimed to determine the factors affecting good governance in teaching hospitals.

**Methods:** This study was a scoping review of Iranian databases, including IranDoc, ISD, Magiran and International databases such as Science Direct, ISI, PubMed and Scopus to meet the good governance factors in teaching hospitals. There were no time limitations to data collection, the keywords governance, good governance, hospital governance, and good governance in hospitals, teaching hospitals, hospital management, hospital leadership, and their synonyms were used in the search strategy. The content analysis method was used to analyze selected studies.

**Results:** The findings showed that the characteristics of effective governance in teaching hospitals can be considered as follows: efficiency, managing conflict of interests, facilitated operation, managed and under control activities, integration, and synergy, achieving the desired consequences, creating an atmosphere that is rewarding and for each member.

**Conclusion:** Based on the results regarding the good governance model in teaching hospitals, it is recommended that on the basis of the nature of service, the mission and value of teaching hospitals have to be clearly redefined. On the other hand, the methods based on which we treat patients should be seriously redefined and we should pay more attention to the patient's values because the patients feel that we are practicing and testing them.

McKee,2023-03-07 *Hospital City Health Care Nation* recasts the story of the U S health care system by emphasizing its economic social and medical importance in American communities Focusing on urban hospitals and academic medical centers the book argues that the country s high level of health care spending has allowed such institutions to become vital if often problematic economic anchors for communities Yet that spending has also constrained possibilities for comprehensive health care reform over many decades even after the passage of the Affordable Care Act in 2010 At the same time the role of hospitals in urban renewal in community health provision and as employers of low wage workers has contributed directly to racial health disparities Guian A McKee explores these issues through a detailed historical case study of Baltimore s Johns Hopkins Hospital while also tracing their connections across governmental scales local state and federal He shows that health care spending and its consequences rather than insurance coverage alone are core issues in the decades long struggle over the American health care system In particular *Hospital City Health Care Nation* points to the increased role of financial capital after the 1960s in shaping not only hospital growth but also the underlying character of these vital institutions The book shows how hospitals quest for capital has interacted with structural racism and inequality to shape and constrain the U S health care system Building on this reassessment of the hospital system its politics and its financing *Hospital City Health Care Nation* offers ideas for the next steps in health care reform **Governing Medicine: Theory And Practice** Gray, Andrew,Harrison, Stephen,2004-07-01 Gray and Harrison have assembled an impressive array of authors to analyse the changing role of the medical profession The contributions range from historical analyses of the relationship between government and doctors to detailed examination of the implementation of clinical governance in the NHS All offer important insights into an issue that lies at the heart of contemporary debates in health policy Chris Ham University of Birmingham This book brings together the most pertinent discussion on clinical governance by some of the most eminent practitioners and
