Cloud computing is the current most trendy and social technology that has been launched on the network world which can
also be called as a reincarnation or evolution of Grid computing so the Clouds are considered as a new generation of Grid
computing These Clouds consist of data centres which are owned by individual institute organisations or companies The
homogeneity within each data centre in the infrastructure is the main feature for the cloud computing compared to grid

Cloud computing and there seems to be no consensus on what a Cloud is Cloud Computing is not a completely new concept it
has intricate connection to the relatively new but thirteen year established Grid Computing paradigm and other relevant
